Alfred Tarski Andrew McFarland, Joanna McFarland, James T. Smith, 2014-08-11 Alfred Tarski 1901 1983 was a renowned Polish American mathematician a giant of the twentieth century who helped establish the foundations of geometry set theory model theory algebraic logic and universal algebra Throughout his career he taught mathematics and logic at universities and sometimes in secondary schools Many of his writings before 1939 were in Polish and remained inaccessible to most mathematicians and historians until now This self contained book focuses on Tarski s early contributions to geometry and mathematics education including the famous Banach Tarski paradoxical decomposition of a sphere as well as high school mathematical topics and pedagogy These themes are significant since Tarski s later research on geometry and its foundations stemmed in part from his early employment as a high school mathematics teacher and teacher trainer The book contains careful translations and much newly uncovered social background of these works written during Tarski s years in Poland Alfred Tarski Early Work in Poland serves the mathematical educational philosophical and historical communities by publishing Tarski s early writings in a broadly accessible form providing background from archival work in Poland and updating Tarski s bibliography A list of errata can be found on the author Smith s personal webpage

Material Mystery Karmen MacKendrick, 2021-08-17 Material Mystery considers three apparently anthropocentric myths that are central to Abrahamic religions those of the primal human the incarnated and possibly divine redeemer and the resurrected body At first glance these stories reinforce a human centered theology and point to a very anthropomorphic God Taking them seriously seems to ignore the material turn in the humanities entirely with the same sort of willful ignorance that some of our politicians show in declaring that their myths count as facts or that the point of the rest of the world is to further human consumption But it is possible Karmen MacKendrick shows to read these figures through a particular tradition that emerges from the Hebrew Bible the tradition of Wisdom as a creative force Wisdom texts are common across the ancient Near East As the idea of creative Wisdom develops from antiquity into the middle ages it gathers philosophical influences from a range of philosophical traditions This exuberantly promiscuous impurity intellectual artistic and theological generates new interpretive possibilities In these interpretations each human like figure opens up onto the world s matter as an interdependent part of it and matter is thoroughly mixed with divinity Such mythic readings complement our factual

scientific understanding of the material world to engage wider kinds of knowing and affective attention particularly Wisdom's combination of care and delight
