Selling Our Souls Adam Dalton Reich, 2016-11-08 Health care costs make up nearly a fifth of U S gross domestic product but health care is a peculiar thing to buy and sell Both a scarce resource and a basic need it involves physical and emotional vulnerability and at the same time it operates as big business Patients have little choice but to trust those who provide them care but even those providers confront a great deal of medical uncertainty about the services they offer Selling Our Souls looks at the contradictions inherent in one particular health care market hospital care Based on extensive interviews and observations across the three hospitals of one California city the book explores the tensions embedded in the market for hospital care how different hospitals manage these tensions the historical trajectories driving disparities in contemporary hospital practice and the perils and possibilities of various models of care As Adam Reich shows the book s three featured hospitals could not be more different in background or contemporary practice PubliCare was founded in the late nineteenth century as an almshouse in order to address the needs of the destitute HolyCare was founded by an order of nuns in the mid twentieth century offering spiritual comfort to the paying patient And GroupCare was founded in the late twentieth century to rationalize and economize care for middle class patients and their employers Reich explains how these legacies play out today in terms of the hospitals different responses to similar market pressures and the varieties of care that result Selling Our Souls is an in depth investigation into how hospital organizations and the people who work in them make sense of and respond to the modern health care market

Not What the Doctor Ordered Jeffrey C. Bauer, 2019-07-08 This 25th Anniversary edition completely updates the powerful insights and policy recommendations of Not What the Doctor Ordered first published in 1993 by renowned healthcare futurist and medical economist the author It presents specific solutions to serious problems of cost quality access and outcomes by allowing all Americans to purchase services directly from caregivers who provide an expanding array of medical services at least as well as physicians at lower cost Focusing on new realities of

the 21st century the author shows not only why giving consumers the right to choose advanced practitioners is the top priority for improving our overpriced underperforming medical care delivery system but also how to make the necessary changes As he clearly and concisely explains from medical and economic perspectives the key is eliminating physicians monopoly powers over advanced practice nurses clinical pharmacists physical therapists clinical psychologists and other advanced practice AP health professionals who now rival physicians in scientific knowledge and caregiving skills within well defined scopes of practice regulated by state governments
