method to bioactive coating films The comprehensive scope and integrated treatment of topics make this reference volume ideal for R D scientists and engineers across a wide range of disciplines and professional interests Stone Restoration Handbook Chris Daniels, 2015-03-23 Whether you are an artisan an architect or a homeowner The Stone Restoration Handbook demonstrates the best approach and techniques to use when preserving and repairing historic buildings It introduces the materials and the processes and explains the proven methods to conserve repair and restore stone masonry statuary and monuments This new book is packed with illustrations examples and advice on stone selection and working lime and mortars pointing cleaning and repairing mortar and stone It guides you through assessing the job on the first site visit through to discussing the options and difficulties you can face This is essential reading for those who care for and repair historic buildings and monuments Contents include surveying for a conservation report setting up workshop and tools stone selection and working lime and mortars pointing repairing mortar and stone cleaning consolidation casting and scagliola Superbly illustrated with 564 colour photographs **Materials for Conservation** C V Horie, 2013-05-13 Materials in Conservation is the definitive introduction to the properties of materials used in conservation The continual struggle of conservators to ameliorate the deterioration of objects has led to increasing use of synthetic polymers These materials are part of the sophisticated technology that has been developed to augment and often replace traditional materials and methods Conservators therefore have a wider range of techniques available However they must be able to appreciate the potentials and pitfalls of any proposed technique The first section explains physical and chemical properties which are important in the conservation process i e application ageing reversal The topics covered include molecular weight glass transition temperature solubility and solvents polymerisation and degradation reactions The second section provides a detailed consideration of the individual materials current and obsolete used in conservation drawing out the factors relevant to their effects on objects The conservation uses of each material are summarised and referenced to allow further study In five appendices the properties of the polymers solvents and their interactions are tabulated with a list of suppliers and conversion table of physical units IUPAC and SI nomenclature is used throughout the book In this second edition this classic text is revised and updated to include modern materials such as cyclododecane and current ideas on adhesion consolidation and reversibility making Materials in Conservation the definitive source of vital information in the field This handy reference book should be on the bench of every conservator and available wherever objects from steam engines to dried plants are preserved *The Archaeologist's Manual for Conservation* Bradley A. Rodgers, 2007-05-08 This is a Foreword by an archaeologist not a conservator but as Brad Rodgers says Conservation has been steadily pulled from archaeology by the forces of specialization p 3 and he wants to remedy that situation through this manual He sees this work as a call to action for the non professional conservator permitting curators conservators and archaeologists to identify artifacts that need professional attention and allow these professionals to stabilize most artifacts in their own laboratories with minimal intervention using

simple non toxic procedures p 5 It is the mission of Brad s manual to bring conservation back into arch ology p 6 The degree of success of that goal depends on the degree to which archaeologists pay attention to and put to use what Brad has to say because as he says The conservationist archaeologist is responsible to make preparation for an artifact s care even before it is excavated and after its storage into the foreseeable future a tremendous responsibility p 10 The manual is a combination of highly technical as well as common sense methods of conserving wood iron and other metals ceramics glass and stone organicsandcomposits afarbetterguidetoartifactconservationthanwasava able to me when I rst faced that archaeological challenge at colonial Brunswick Town North Carolina in 1958 a challenge still being faced by archaeologists today The stage of conservation in 1958 is in dramatic contrast to the procedures Brad describes in this manual conservation has indeed made great progress For instance acommonprocedurethenwastoheattheartifactsredhotinafurnace a method that made me cringe
