Yana Weinstein,Megan Sumeracki,Oliver Caviglioli,2018-08-22 Educational practice does not for the most part rely on research findings Instead there is a preference for relying on our intuitions about what is best for learning But relying on intuition may be a bad idea for teachers and learners alike This accessible guide helps teachers to integrate effective research backed strategies for learning into their classroom practice The book explores exactly what constitutes good evidence for effective learning and teaching strategies how to make evidence based judgments instead of relying on intuition and how to apply findings from cognitive psychology directly to the classroom Including real life examples and case studies FAQs and a wealth of engaging illustrations to explain complex concepts and emphasize key points the book is divided into four parts Evidence based education and the science of learning Basics of human cognitive processes Strategies for effective learning Tips for students teachers and parents Written by The Learning Scientists and fully illustrated by Oliver Caviglioli Understanding How We Learn is a rejuvenating and fresh examination of cognitive psychology's application to education This is an essential read for all teachers and educational practitioners designed to convey the concepts of research to the reality of a teacher's classroom [The Manhattan Project and the Dropping of the Atomic Bomb](#) Aaron Barlow,2019-11-08 This

invaluable resource offers students a comprehensive overview of the Manhattan Project and the decision to drop the atomic bomb with more than 80 in depth articles on a variety of topics and dozens of key primary source documents This book provides everything readers need to know about the Manhattan Project the U S program that led to the development of the atomic bomb during World War II It begins with a detailed introduction to the project and includes an alphabetical collection of relevant entries on such topics as the Enola Gay the first aircraft to drop an atomic bomb Enrico Fermi creator of the first nuclear reactor Hiroshima the target of the first atomic bomb and Robert Oppenheimer director of the Manhattan Project Dozens of primary sources include eyewitness accounts government memos letters press releases and other important documents relevant to the establishment and success of the Manhattan Project A set of four essays written by prominent

scholars address whether the United States was justified in dropping the atomic bomb on Japan The book also includes a comprehensive chronology that reveals key moments related to the creation of the world's first nuclear weapon as well as a bibliography of resources that points readers toward additional information on the Manhattan Project nuclear weapons and World War II

Management, 1983

Atomic Tragedy Sean Langdon Malloy, 2008 Atomic Tragedy offers a unique perspective on one of the most important events of the twentieth century As secretary of war during World War II Henry L Stimson 1867 1950 oversaw the American nuclear weapons program In a book about how an experienced principled man faltered when confronted by the tremendous challenge posed by the intersection of war diplomacy and technology Sean L Malloy examines Stimson's struggle to reconcile his responsibility for the most terrible weapon ever known in human history with his long standing convictions about war and morality Ultimately Stimson's story is

one of failure despite his beliefs Stimson reluctantly acquiesced in the use of the atomic bomb against heavily populated Japanese cities in August 1945 This is the first biography of Stimson to benefit from extensive use of papers relating to the Manhattan Project Malloy has also uncovered evidence illustrating the origins of Stimson's commitment to eliminating or refining the conduct of war against civilians information that makes clear the agony of Stimson's dilemma The ultimate aim of Atomic Tragedy is not only to contribute to a greater historical understanding of the first use of nuclear weapons but also to offer lessons from the decision making process during the years 1940-1945 that are applicable to the current world environment As the United States mobilizes scientists and engineers to build new and supposedly more usable nuclear weapons and as nations in Asia and the Middle East are replicating the feat of the Manhattan Project physicists at Los Alamos it is more important than ever that policymakers and analysts recognize the chain of failures surrounding the first use of those weapons at Hiroshima and Nagasaki

Virginia English Bulletin, 1992 **Current Catalog** National Library of Medicine (U.S.), 1982 First multi year cumulation covers six years 1965-70 *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), 1982
