Manufacturing Technology Transfer Yasuo Yamane, Tom Childs, 2018-10-08 Based on a bestselling book originally published in Japanese Manufacturing Technology Transfer A Japanese Monozukuri View of Needs and Strategies offers time tested methods and little known tips for achieving successful transfer of technology along with the skills required to operate that technology Designed to support a series of lectures on technology transfer within a master s course on the management of technology it presents the results of years of research carried out at Hiroshima University The book delves into the authors decades of experience transferring technology between Japan and the rest of the world particularly to developing countries from where much of the world s future economic growth is expected It contains case studies of successful technology transfers from both the ship building and food equipment industries Its wide reaching coverage examines methods of skill transfer production management and manufacturing company classification Introducing readers to the engineering activities that occur within the manufacturing industry the book illustrates the engineering technology activities involved in manufacturing along with the production management activities required to support them It also explains how job simulators can help shorten learning times in the manufacturing industry in the same way that flight simulators are used to teach flying skills to pilots The book outlines a framework for teaching and learning processes that can be visualized in terms of an S

shaped learning curve It explains how technology transfer overseas should be supported by contractual agreements between the parties concerned Detailing the legal contractual responsibilities for all parties involved it also describes what you should do if problems arise during the transfer Integrating previously unpublished research results with illustrative case studies this book is suitable for a wide audience within the manufacturing industry including manufacturing engineering students in both developed and developing countries those responsible for the development of manufacturing engineers in industry and elsewhere and anyone interested in the international activities of Japanese manufacturing companies

Buried Glory Istvan Hargittai, 2013-09-19 Moscow's Novodevichy Cemetery is the final resting place of some of Russia's most celebrated figures from Khrushchev and Yeltsin to Anton Chekhov Sergei Eisenstein Nikolai Gogol and Mikhail Bulgakov Using this famed cemetery as symbolic starting point Buried Glory profiles a dozen eminent Soviet scientists nine of whom are buried at Novodevichy men who illustrate both the glorious heights of Soviet research as well as the eclipse of science since the collapse of the USSR Drawing on extensive archival research and his own personal memories renowned chemist Istvan Hargittai bring these figures back to life placing their remarkable scientific achievements against the tense political backdrop of the Cold War Among the eminent scientists profiled here are Petr L Kapitza one of the most brilliant representatives of the great generation of Soviet physicists a Nobel Prize winner who risked his career and his life standing up for fellow scientists against Stalin Yulii B Khariton who ran the highly secretive Soviet nuclear weapons laboratory Arzamas 16 despite being Jewish and despite the fact that his father Boris had been sent to the labor camps And Andrei D Sakharov the father of the Soviet hydrogen bomb and a brilliant fighter for human rights for which he won the Nobel Peace Prize Along the way Hargittai shines a light on the harrowing conditions under which these brilliant researchers excelled Indeed in the post war period Stalin's anti-Semitism and ongoing anti science measures devastated biology damaged chemistry and nearly destroyed physics The latter was saved only because Stalin realized that without physics and physicists there could be no nuclear weapons The extraordinary scientific talent nurtured by the Soviet regime belongs almost entirely to the past Buried Glory is both a fitting tribute to these great scientists and a fascinating account of scientific work behind the Iron Curtain

Review Oak Ridge National Laboratory, 1987 *Japan Socialist Review*, 1963-06 Stalin and the Bomb David Holloway, 2008-10-01 The classic and utterly engrossing study of Stalin's pursuit of a nuclear bomb during the Cold War by the renowned political scientist and historian Foreign Affairs For forty years the U S Russian nuclear arms race dominated world politics yet the Soviet nuclear establishment was shrouded in secrecy Then shortly after the collapse of the Soviet Union David Holloway pulled back the Iron Curtain with his marvelous groundbreaking study Stalin and the Bomb The New Yorker How did the Soviet Union build its atomic and hydrogen bombs What role did espionage play How did the American atomic monopoly affect Stalin's foreign policy What was the relationship between Soviet nuclear scientists and the country's political leaders David Holloway answers these questions by tracing the dramatic story of Soviet nuclear policy

from developments in physics in the 1920s to the testing of the hydrogen bomb and the emergence of nuclear deterrence in the mid 1950s This magisterial history throws light on Soviet policy at the height of the Cold War illuminates a central element of the Stalinist system and puts into perspective the tragic legacy of this program environmental damage a vast network of institutes and factories and a huge stockpile of unwanted weapons

Changing the Status Quo Scott D. Wurdinger,2018-01-23 Have you ever wondered where the ever expanding layers of bureaucracy are taking us in the field of education This book challenges us to think carefully about this question The status quo in education consists of policies practices and power structures impacting the way we teach and prevent students from learning in meaningful and significant ways Assessment techniques drive our teaching practices resulting in a learning process that students strongly dislike Technology like PowerPoint presentations and clickers force students to pay attention to lectures but the end result is the same memorizing information for exams It is causing students to become less focused on comprehending what they read It is also physically changing the way students read focusing on small sound bites on what they believe is necessary to remember for tests Discriminating against students of color continues to be a prevalent problem as well Data show that white educators consist of a huge majority often lacking cultural awareness in our classrooms Reading this book will inspire you to become a courageous educator and implement meaningful changes in your classroom on how to asses your students what kind and how much technology to use and how to sensitively treat educators and students of color
