## **Historic Design Guidelines:**

Glen Ridge Historic Design Guidelines Steven Smolyn, 2021-09-29 The HPC created Design Guidelines for the Glen Ridge Historic District to codify the long standing design principles utilized in the review and approval of renovations repairs and expansion of properties in Glen Ridge Funded by a grant from the New Jersey Historic Preservation Office and the National Park Service these guidelines provide an easy to use reference document for residents architects and contractors to plan projects and facilitate the HPCs design review process The Design Guidelines are intended to further the appreciation of the architecture setting and history of Glen Ridge to help ensure consistency in local decision making and to benefit property owners by clarifying community expectations These Design Guidelines offer information on the rehabilitation of existing buildings including new additions and new construction to offer a common body of knowledge for all participants in the review process including Commission members The HPC recognized that applying design guidelines is often challenging especially in Glen Ridge where there is so much variety in the architecture These Design Guidelines are intended to codify the objective basis for the HPC s decisions and help increase public awareness of historically appropriate design However the Design Guidelines do not offer all of the answers or solutions to a homeowner or design team as good architectural design cannot be achieved only by applying a set of rules The challenge for both the homeowner and the HPC member is knowing how to apply the Design Guidelines to make sound judgments that will help preserve the architectural character of Glen Ridge while also allowing expressions of change and adaptation *City of San Antonio Historic Design Guidelines* San Antonio (Tex.). the condition treatment and use of the legacy of existing properties in the United States Drawing on a wide range of research experience and scholarship over the last fifty years it allows us to re think past and current ideas in preservation challenging readers to explore how their own interests lie within the cognitive framework of the activities taking place with people who care Who is involved is explored first in such a way as to explore why before examining what is deemed important After that the questions of when and how to proceed are given attention The major topics are introduced in an historical review through the mid 1980s after which the broad intellectual basis and fundamental legal framework is provided The economic shifts associated with major demographic changes are explored in tandem with responses of the preservation community A chapter is dedicated to the financial challenges and sources of revenue available in typical preservation projects and another chapter focuses on the manner in which seeing recording and interpreting information provides the context for an appropriate vision for the future In this regard it is made clear that not all green design alternatives are preservation sensitive The advocacy battles during the last few decades provide a number of short stories of the ethical battles regarding below ground and above ground historic resources and the eighth chapter attempts to explain why religion has been long held at arm s length in publicly supported preservation efforts when in fact it holds more potential to regenerate existing sites than any governmental program
