Chronicles of Care: A Design History of the COVID-19 Virus Paul A.

Rodgers,Fernando Galdon,Craig Bremner,2024-04-16 The Covid 19 crisis and the designed interventions that the authors have catalogued in this book prove definitively that design does care The authors documented this as it evolved every day from the 1st January 2020 to 31st May 2020 inclusive Then they looked at all of this care and caring from the point of view of design and by the sheer volume of design interventions they have documented illustrate that design is good in a crisis What the Covid 19 pandemic illustrated is that for the first time in modern history capital was totally irrelevant Money could not save your life Only design could Rapidly designed masks shelters hospitals instructional posters infographics dashboards respirators sanitisers virtual and local communities emerged to save us From January 2020 design became king The Covid 19 global pandemic presented an ontological reality design is more than margins or profit In fact design became extremely valuable when it stopped concentrating on those things and started to care about peoples lives This brief episode in history is still repositioning the status of design and reconfiguring its signifier from consumption to care The contents of this book cover the outbreak lockdown and the beginning of the reopening in the UK In between the book functions as a history of pandemic crisis design interventions As such it is a research in the moment project where we have illustrated our thoughts and insights in tables charts and diagrams We have accepted all design interventions as valid and given them the same role and status by presenting each of them in a standard format No curation No selection No position The task of critical analysis must follow perhaps by us certainly by others

El año de la peste Enrique Carpintero,2020-08-04 La pandemia por un lado pone en evidencia las consecuencias que una sociedad consumista genera en el tejido social y ecológico por otro lado lleva a que los procesos de subjetivación propios del capitalismo tarden o sean atravesados por los fantasmas que produce la angustia y la incertidumbre ante la presencia de la muerte Pero no de la muerte final de la que nada podemos decir sino cómo su presencia ominosa nos remite al decir de Freud a esa primera muerte que se ala el desvalimiento originario que aparece con nuestro nacimiento Esta es la vivencia de una sensación de fragilidad que produce diferentes sentimientos individuales y sociales En este sentido la necesaria cuarentena y el distanciamiento social con los cuales nos cuidamos de que el otro no nos contagie atraviesa la subjetividad de tal manera que simbólicamente va a continuar La pandemia en algún momento va a terminar pero sus marcas van a continuar El peligro es que el barbijo también tape nuestra subjetividad en el encuentro con el otro que afiance la ruptura del lazo social en especial ante la crisis social política y económica De allí la importancia de generar un pensamiento crítico que se sostenga en una práctica que permita producir comunidad Este es el sentido de los textos que componen el libro Sus artículos fueron especialmente escritos para nuestra página web y publicados entre marzo y junio de este año 2020 Participan sociólogos psicoanalistas antropólogos maestros psicólogos filósofos epidemiólogos no solo de Argentina sino de Grecia Chile Uruguay Israel Francia Italia y Alemania

Impactos de la COVID-19 en el sistema internacional y en la integración regional Miguel Ángel Vázquez Ruiz,Carmen O. Bocanegra Gastelum,Amalia Stuhldreher,Amílcar Davyt,Alberto José Hurtado Briceño,Johana del Valle Molina Durán,Sadcidi Zerpa de Hurtado,Roberto Goulart Menezes,Rafael Alexandre Mello,Jorge Damián Rodríguez Díaz,Stéphan Sberro,2021-04-08 Son muy variados los cambios que la covid 19 traerá en la pospandemia la cual será una dura etapa de recuperación de los profundos estragos que deja el coronavirus y se dependerá de las decisiones que tome la humanidad si serán mayoritariamente favorables con la construcción de un entorno más cooperativo y solidario o si se agrandarán aún más las diferencias entre países desarrollados y en desarrollo y entre estratos sociales Un ajuste muy esperado es en el modelo económico de apertura económica en el que vuelve a ser importante un enfoque poskeynesiano de Estado de bienestar que permita atender políticas públicas fundamentales como la de la salud incluso en naciones

desarrolladas como las de América del Norte acompañado de prácticas de gobernanza multinivel exitosas en América Latina como la lograda en Uruguay con medidas regionales efectivas de salud pública que recuperen el alcance de la institucionalidad. En cambio la situación es compleja en la actualidad en países como Brasil por el desconocimiento de la gravedad de la pandemia. Por otra parte los que se tendrán crecimiento acelerado son los avances tecnológicos en los cuales la inteligencia artificial apoyada en la robótica la big data y el Internet de las cosas contribuirán desde el disputado liderazgo entre Estados Unidos y China y desde el desarrollo en la propia América Latina a ser herramientas para controlar mejor el coronavirus. La digitalización impactará sectores industriales claves como el automotriz en procesos de integración como Mercosur o la tecnología financiera Fintech estimular el desarrollo del emprendimiento y una mayor inclusión financiera en Latinoamérica. Finalmente los ajustes en el sistema internacional inciden en regiones del planeta tan diversas y distanciadas como el Medio Oriente.
