and resources for creating and adopting new business models to develop products services and finding a niche market as well as enhance a learning organization entrepreneurial resilience and sustainable entrepreneurship Microfinance Financial Innovation and Sustainable Entrepreneurship in Economics analyzes the influence of microfinance and financial innovation on sustainable entrepreneurship through a different thematic lens It investigates how microfinance institutions through financial innovation help the poor to start and sustain their businesses foster sustainable entrepreneurship empower women promote sustainable entrepreneurship and reduce poverty Covering topics such as income distribution financial inclusion and digital payment trends this book is an excellent resource for finance professionals economists entrepreneurs researchers professionals scholars academicians and more

Educational Innovation in Economics and Business VI Tor A. Johannessen,Ansgar Pedersen,Kurt Petersen,2013-04-17 Business education and business research has often been criticized by the business community which claims that much of it is mainly directed at the establishment of teachers and researchers themselves instead of distributing their knowledge to the business community It may seem that many universities and other research institutions have turned into mere knowledge manufacturers where the emphasis is more on the output volume than on quality of relevance with little or no consideration for the end users As universities and corporations attempt to prepare management to be alert to future changes improved and even brand new teaching methodologies are required The main focus of the present volume is on the distribution and selection of new knowledge How can business educators deliver new knowledge to students and the business community more rapidly than before How should we define the core business curriculum when new knowledge becomes old knowledge

Status, technological innovations, and industry development needs of mud crab (Scylla spp.) aquaculture Food and Agriculture Organization of the United Nations,2025-02-23 The FAO Expert Workshop on Mud Crab Aquaculture held in Singapore brought together leading experts to address critical challenges and emerging opportunities in the sustainable farming of Scylla spp mud crabs Driven by escalating demand for both hard shell and soft shell mud crabs the sector faces constraints such as overfishing habitat degradation reliance on wild seedstock and unsustainable farming practices The workshop provided a collaborative platform to evaluate the current state of the industry identify technological innovations and set a course for advancing sustainability and resilience in mud crab aquaculture Central to the discussions was the transition from capture based to hatchery based production systems to secure consistent and high quality seedstock Experts highlighted the importance of domestication and selective breeding to enhance aquaculture yields The development of formulated feeds reducing reliance on wild sourced feed and the integration of advanced technologies such as probiotics and recirculating aquaculture systems RAS were identified as critical pathways to address water quality biosecurity and production efficiency challenges Innovative farming system approaches were presented including sustainable polyculture systems and the adoption of cellular farming techniques to mitigate cannibalism and improve survival rates The potential of the soft shell crab sector for value addition through

enhanced post harvest practices packaging and processing was also discussed though key bottlenecks such as limited seedstock availability forced moulting practices and inconsistent farming standards need to be adequately addressed Broader ecological concerns such as the overexploitation of wild populations and the degradation of mangrove habitats were highlighted Experts advocated strengthened fishery management habitat restoration and policy interventions to mitigate these issues Additionally the role of advanced technologies such as IoT enabled systems digital training tools and automation was underscored as transformative for achieving scalability and operational efficiency in mud crab farming Aligned with FAO's Blue Transformation initiative the workshop outlined a comprehensive strategy to promote sustainable development in the mud crab aquaculture sector Key recommendations included establishing broodstock banks deploying cost effective disease screening enhancing international collaboration and scaling capacity building programmes to share knowledge and technologies across diverse aquaculture contexts By fostering innovation improving productivity and addressing environmental challenges the outcomes of the workshop aim to strengthen global food security enhance aquaculture value chains and sustain the livelihoods of communities dependent on mud crab production Digital Media and Innovation

Richard A. Gershon, 2016-02-11 Digital Media and Innovation takes an in depth look at how smart creative companies have transformed the business of media and telecommunications by introducing unique and original products and services Today's media managers are faced with the same basic question what are the best methods for staying competitive over time In one word innovation From electronic commerce Amazon Google to music and video streaming Apple Pandora and Netflix digital media has transformed the business of retail selling and personal lifestyle This text will introduce current and future media industry professionals to the people companies and strategies that have proven to be real game changers by offering the marketplace a unique value proposition for the consumer *Innovation Cell* Burkard Wördenweber, Uwe

Weissflog, 2005-12-08 There are many ways to describe the gap which a lean company has to jump to become innovative Some people see the gap between research and design for production where people with different mindsets find it hard to communicate and work for the same goal Other people feel that the gap is the schism between effectiveness and efficiency i.e. trying to do the right thing is not compatible with trying always to do things right Other people believe the gap to be caused by the different paradigms of exploitation and exploration The financial constraints of globally competing companies striving to become more and more lean are leaving fewer and fewer resources for the necessary experimentation to find successful innovations Whatever the explanation one thing is certain globally acting companies have to marry short term success with long term sustainability They have to be at the same time competitive with current products and services and innovative to prepare future products and services This book offers a novel view for management to address and implement innovation It shows that innovation can not be ordered but has to be lived It illustrates with real life examples how innovation requires courage to do the right thing and not always just the safe thing And it shows that courage can be its own reward I
