Energy Star Buildings Manual ,1995 **Building Tools** ,1998 **Electrical Energy Efficiency** Andreas Sumper, Angelo Baggin, 2012-03-15 The improvement of electrical energy efficiency is fast becoming one of the most essential areas of sustainability development backed by political initiatives to control and reduce energy demand Now a major topic in industry and the electrical engineering research community engineers have started to focus on analysis

diagnosis and possible solutions Owing to the complexity and cross disciplinary nature of electrical energy efficiency issues the optimal solution is often multi faceted with a critical solutions evaluation component to ensure cost effectiveness This single source reference brings a practical focus to the subject of electrical energy efficiency providing detailed theory and practical applications to enable engineers to find solutions for electroefficiency problems It presents power supplier as well as electricity user perspectives and promotes routine implementation of good engineering practice Key features include a comprehensive overview of the different technologies involved in electroefficiency outlining monitoring and control concepts and practical design techniques used in industrial applications description of the current standards of electrical motors with illustrative case studies showing how to achieve better design up to date information on standarization technologies economic realities and energy efficiency indicators the main types and international results coverage on the quality and efficiency of distribution systems the impact on distribution systems and loads and the calculation of power losses in distribution lines and in power transformers With invaluable practical advice this book is suited to practicing electrical engineers design engineers installation designers M E designers and economic engineers It equips maintenance and energy managers planners and infrastructure managers with the necessary knowledge to properly evaluate the wealth of electrical energy efficiency solutions for large investments This reference also provides interesting reading material for energy researchers policy makers consultants postgraduate engineering students and final year undergraduate engineering students

Efficient Lighting Applications and Case Studies Scott C. Dunning, Albert Thumann, 2020-12-18 With the increased concern for energy conservation in recent years much attention has been focused on lighting energy consumption and methods for reducing it Along with this concern for energy efficient lighting has come the realization that lighting has profound effects on worker productivity as well as important aesthetic qualities This book presents an introduction to lighting design and energy efficiency which can be utilized while maintaining the quality of illumination Topics include lighting energy management selection of lamps task lighting lighting design lighting control reflectors ballast selection natural daylighting wireless lighting control and case studies *Electric Utility Guide to Marketing Efficient Lighting* ,1990

Energy Efficiency and Sustainable Lighting Manuel J. Hermoso-Orzáez, Alfonso Gago-Calderón, 2020-03-25 The lighting of both exteriors and interiors is a field within electrical and lighting engineering where important technological changes have been taking place oriented towards environmental sustainability and energy efficiency LED technology has been gradually gaining ground in the world of lighting over other technologies due to its high lighting and energy efficiency and savings However some problems related to overheating or associated regulation are emerging This has prompted the search for new more efficient and sustainable forms of lighting This book presents successful cases related to energy efficiency and lighting that may be of great interest to those trying to enter the world of scientific research *Energy Efficiency Design Guide for California Detention Facilities* ,2001 *Guide to Energy Management, Fifth Edition* Barney L. Capehart, Wayne C.

Turner, William J. Kennedy, 2006-01-18 Written by three of the most respected energy professionals in the industry this fifth edition of a bestseller is an energy manager's guide to the most important areas of energy cost cutting. It examines the core objectives of energy management and illustrates the latest and most effective strategies, techniques and tools for improving lighting efficiency, combustion processes, steam generation, distribution and industrial waste reutilization. The book thoroughly brings up to date such topics as energy system management, energy auditing, rate structures, economic evaluation, HVAC optimization, control systems and computers, process energy, renewable energy and industrial water management. *Guide to Energy Management* Barney L. Capehart, Wayne C. Turner, William J. Kennedy, 2003 *Daylighting and electric lighting retrofit solutions* Aktuna, Berat, Bueno, Bruno, Darula, Stanislav, Deneyer, Arnaud, Diakite, Aicha, Fuhrmann, Peter, Geisler-Moroder, David, Hubschneider, Carolin, Johnsen, Kjeld, Kostro, Andre, Malikova, Marta, Matusiak, Barbara, Prella, Patrick, Pohl, Wilfried, Tao, Luo, Tetri, Eino, 2016-11-03 Energy efficient lighting is said to be one of the most cost effective approaches to save energy and reduce CO₂ emissions. In order to stimulate the application of lighting retrofits of good quality IEA Task 50 Subtask B Daylighting and Electric Lighting solutions has looked into the assessment of existing and new technical retrofit solutions in the field of facade and daylighting technology, electric lighting and lighting controls. The document provides information for those involved in the development of retrofit products or involved in the decision making process of a retrofit project such as buildings owners, authorities, designers and consultants as well as the lighting and facade industry. This source book addresses both electric lighting solutions and daylighting solutions and offers a method to compare these retrofit solutions on a common basis including a wide range of quality criteria of cost related and lighting quality aspects. Simple retrofits such as replacing a lamp or adding interior blinds are widely accepted, often applied because of their low initial costs or short payback periods. The work presented in this report aims at promoting state of the art and new lighting retrofit approaches that might cost more but offer a further reduction of energy consumption while improving lighting quality to a greater extent. *Energieeffiziente Beleuchtung ist eine der effektivsten Möglichkeiten Energie zu sparen und damit die Emission von CO₂ zu vermindern.* Im Rahmen des IEA Task 50 Subtask B Daylighting and Electric Lighting solutions wurden daher neue und vorhandene technische Sanierungslösungen für Gebäude in den Bereichen Fassade, Tageslichttechnik, künstliche Beleuchtung sowie Lichtsteuerung bewertet, um die Anwendung hochwertiger Lösungen voranzutreiben. Die Informationen sind dabei für alle in den Sanierungsprozess einbezogenen Personen von großem Interesse wie z.B. Gebäudeeigentümer, Behörden, Planer und Berater, aber auch für Hersteller und Entwickler von Beleuchtungs- und Fassadenlösungen. Betrachtet werden sowohl künstliche als auch Beleuchtungslösungen mit Tageslicht, wobei eine Methode entwickelt wurde, die Sanierungslösungen grundlegend miteinander zu vergleichen. Hierbei werden zahlreiche Kriterien berücksichtigt, die energetische, lichttechnische, thermische und kostenbezogene Aspekte beinhalten. Einfache Sanierungsmaßnahmen wie der Austausch von Lampen oder die Montage innenliegender Jalousien werden weitgehend akzeptiert und oft

verwendet da sie kostengünstig sind und sich schnell amortisieren Die vorliegende Arbeit hat es sich zum Ziel gesetzt die Anwendung neuer und dem Stand der Technik entsprechender Beleuchtungslösungen für die Sanierung zu fördern Diese verursachen zwar eventuell höhere Kosten ermöglichen jedoch eine weitere Energieeinsparung bei gleichzeitiger Verbesserung der Beleuchtungsqualität
