PLAYGROUND DESIGNER

 PERFORMANCE TASK

OVERVIEW 
You will step into the shoes of a playground designer. Your school has decided to build a new playground with a unique geometric structure. As the lead designer, you have been tasked with determining the measures of various angles to ensure the safety and functionality of the design.

TASK #1 
Imagine you are designing a new playground for your school. The playground will have a unique geometric structure, and you have been tasked with determining the measures of various angles to ensure the safety and functionality of the design. In the playground design, there are four angles labeled as A, B, C, and D. You know that:
- Angle A is a right angle (90 degrees).
- Angle B is a supplementary angle to Angle C.
- Angle D is a complementary angle to Angle C.
To find the measures of angles B, C, and D, you need to set up and solve equations based on the given information.

Write an equation to find each angle.

TASK #2 
Solve each equation that you wrote in task #1 to find the measure of each angle. Remember, Angle C is 40 degrees.

PLAYGROUND DESIGNER

 PERFORMANCE TASK

TASK #3 
Now that you have found the measures of angles B, C, and D, determine if they add up to form a complete angle (360 degrees) or not. Explain your findings.

TASK #4 
Within the playground structure, there are vertical angles formed. Identify the pairs of vertical angles and calculate their measures based on the information you have.

Women and Addiction Kathleen T. Brady,Sudie E. Back,Shelly F. Greenfield,2009-04-02 For many years addiction research focused almost exclusively on men Yet scientific awareness of sex and gender differences in substance use disorders has grown tremendously in recent decades This volume brings together leading authorities to review the state of the science and identify key directions for research and clinical practice Concise focused chapters illuminate how biological and psychosocial factors influence the etiology and epidemiology of substance use disorders in women their clinical presentation course and psychiatric comorbidities treatment access and treatment effectiveness Prevalent substances of abuse are examined as are issues facing special populations *Acceleration for Gifted Learners, K-5* Joan Franklin Smutny,Sally Y.

Walker,Elizabeth A. Meckstroth,2006-10-19 This valuable book dispels common myths about acceleration reviews social emotional considerations and provides tools for effectively determining the most appropriate learning options for gifted students **In Search of Pedagogy Volume I** Jerome S. Bruner,2006-09-27 Jerome Bruner is one of the best known and most influential psychologists of the twentieth century His theories about cognitive development dominate psychology around the world today but it is in the field of education where his influence has been especially felt In this two volume set Bruner has selected and assembled his most important writings about education Volume I spans the twenty years from 1957

to 1978 and Volume II covers 1979 to 2006 Volume I starts with a specially written introduction by Bruner in which he gives an overview of the 1957 1978 years and contextualises his selection of papers The articles and chapters then reveal the thinking the concepts and the empirical research of that time that have made Bruner one of the most respected and cited educational authorities of our time **Abstract Mathematical Cognition** Wolfgang Grodd,Philippe Chassy,2016-08-09

Despite the importance of mathematics in our educational systems little is known about how abstract mathematical thinking emerges Under the uniting thread of mathematical development we hope to connect researchers from various backgrounds to provide an integrated view of abstract mathematical cognition Much progress has been made in the last 20 years on how numeracy is acquired Experimental psychology has brought to light the fact that numerical cognition stems from spatial cognition The findings from neuroimaging and single cell recording experiments converge to show that numerical representations take place in the intraparietal sulcus Further research has demonstrated that supplementary neural networks might be recruited to carry out subtasks for example the retrieval of arithmetic facts is done by the angular gyrus Now that the neural networks in charge of basic mathematical cognition are identified we can move onto the stage where we seek to understand how these basics skills are used to support the acquisition and use of abstract mathematical concepts

Executive Function and Education Mariëtte Huizinga,Dieter Baeyens,Jacob A. Burack,2018-09-21 Executive function is an umbrella term for various cognitive processes that are central to goal directed behavior thoughts and emotions These processes are especially important in novel or demanding situations which require a rapid and flexible adjustment of behavior to the changing demands of the environment The development of executive function relies on the maturation of associated brain regions as well as on stimulation in the child s social contexts especially the home and school Over the past decade the term executive function has become a buzzword in the field of education as both researchers and educators underscore the importance of skills like goal setting planning and organizing in academic success Accordingly in initiating this Research Topic and eBook our goal was to provide a forum for state of the art theoretical and empirical work on this that both facilitates communication among researchers from diverse fields and provides a theoretically sound source of information for educators The contributors to this volume who hail from several different countries in Europe and North America have certainly accomplished this goal in their nuanced and cutting edge depictions of the complex links among various executive function components and educational success *CTET Mathematics & Science 9 Year-wise Solved Papers 1 & 2* Disha Experts,2019-10-21 **Neurophysiology and Neuropsychology of Motor Development** Kevin J.
