

## LED BACKUP AND BRAKE LIGHTS, REPLACE

**NOTE:** Newer models of lift trucks are equipped with LED (Light Emitting Diode) backup and brake tail lights. These light assemblies are non-repairable and must be replaced as a complete unit. See the **Parts Manual** for replacement LED lights.

### Remove

1. Disconnect negative terminal of battery and remove the key.
2. Disconnect the LED light from the chassis light harness.
3. Remove LED light assembly and harness from mounting bracket. See Figure 4.
4. If the LED mounting bracket must be removed from the overhead guard leg, remove the plug, screw and bracket from the overhead guard leg.

### Install

1. If the mounting bracket was removed, install it onto the overhead guard leg. Insert the plug and screw to attach mounting bracket to overhead guard leg. See Figure 4.
2. Install the LED light assembly and harness on the mounting bracket.
3. Connect the LED light to the chassis light harness.
4. Connect the negative terminal of battery and close the hood.

## Counterweight Repair

### WARNING

The lift truck must be put on blocks for some types of maintenance and repair. The removal of the following assemblies will cause large changes in the center of gravity: mast, drive axle, engine and transmission, and counterweight. When the lift truck is put on blocks, put additional blocks in the following positions to maintain stability:

- Before removing the mast and drive axle, put blocks under the counterweight so the lift truck cannot fall backward.

- Before removing the counterweight, put blocks under the mast assembly so the lift truck cannot fall forward.

The surface must be solid, even, and level when the lift truck is put on blocks. Make sure that any blocks used to support the lift truck are solid, one-piece units. See the Operating Manual or Periodic Maintenance 8000 SRM 707 for your lift truck.

The counterweight is held in position on the frame by two hooks that are part of the frame. One M24 x 3
