and iii nonlinear interactions Ocean waves are important for many reasons They are the major environmental impact on in the design of coastal or offshore structures Ocean waves are also fundamental to the processes of coastal flooding and beach erosion They will play a major role in storm related coastal flooding which will rise in frequency as a result of sea level rise Ocean waves are also an important part of the coupled ocean atmosphere system They determine the roughness of the ocean surface and hence have an impact on winds fluxes of energy gases and heat to the ocean and even the stability of ice sheets Containing the latest research on ocean waves it is a valuable resource for an overview of knowledge in this important field
