Routledge Handbook of the International Relations of South Asia Sumit Ganguly, Frank O'Donnell, 2022-10-28 This handbook offers a comprehensive overview of the international relations of South Asia. South Asia as a region is increasingly assuming greater significance in global politics for a host of compelling reasons. This volume offers the most comprehensive collection of perspectives on the international politics of South Asia and it covers an extensive range of issues spanning from inter state wars to migration in the region. Each contribution provides a careful discussion of the four major theoretical approaches to the study of international politics: Realism, Constructivism, Liberalism and Critical Theory. In turn the chapters discuss the relevance of each approach to the issue area addressed in the book. The volume offers coverage of the key issues under four thematic sections: Theoretical Approaches to the Study of the International Relations of South Asia; Traditional and Emerging Security Issues in South Asia; The International Relations of South Asia; Cross cutting Regional Issues. Further every effort has been made in the chapters to discuss the origins, evolution and future direction of each issue. This book will be of much interest to students of South Asian politics, human security, regional security and International Relations in general.

Handbook of the Psychology of Aging, 2015-08-19. Handbook of the Psychology of Aging, Eighth Edition, tackles the biological and environmental influences on behavior as well as the reciprocal interface between changes in the brain and behavior during the course of the adult life span. The psychology of aging is important to many features of daily life, from workplace and the family to public policy matters. It is complex, and new questions are continually raised about how behavior changes with age. Providing perspectives on the behavioral science of aging for diverse disciplines, the handbook explains how the role of behavior is organized and how it changes over time. Along with parallel advances in research methodology, it explicates in great detail patterns and sub patterns of behavior over the lifespan and how they are affected by biological health and social interactions. New topics to the eighth edition include preclinical neuropathology, audition and language comprehension in adult aging, cognitive interventions and neural processes, social interrelations, age differences in the connection of mood and cognition, cross cultural issues, financial decision making, and capacity, technology, gaming, social networking, and more. Tackles the biological and environmental influences on behavior as well as the reciprocal interface between changes in the brain and behavior during the course of the adult life span.
