## **Language Of Science Volume 5 M A K Halliday:**

**Language of Science** M.A.K. Halliday, 2006-06-19 Halliday's investigations into grammatical metaphor take us deeply into the way we construct and expand meanings starting with representations of concrete experienced events and ending with theoretical worlds populated by abstract entities linked through generalized relations and causalities. He finds these processes most strikingly in the development of the modern sciences that have historically created robust virtual worlds of theory from observable material events. He sees the same processes of grammatical metaphor as children learn to participate in our built symbolic environment particularly as they are introduced to these meaning systems in schools an institution designed expressly for that purpose. **ATTRIBUTED MEANINGS** Miriam PÉREZ VENEROS, 2017-12-01 Esta tesis doctoral versa sobre el estudio de la construcción de la atribución del significado en la disseminación de la ciencia en la prensa británica a través del análisis de los recursos utilizados por el periodista para integrar en su narración de los hechos científicos lo que otras fuentes externas han dicho. El fenómeno de la atribución en el discurso académico científico y de los medios de comunicación se ha descrito previamente desde una perspectiva interpersonal mediante el análisis de la evaluación y de la teoría de la valoración appraisal. Además otras investigaciones previas se han centrado también en el estudio de cómo los elementos experienciales de la atribución. Sin embargo el estudio llevado a cabo en esta tesis doctoral trata de proporcionar una descripción más exhaustiva y una visión global de cómo se construye la atribución desde una perspectiva experiencial. El objetivo de esta tesis es explorar cómo los elementos experienciales que construyen la atribución coocurren en cada una de las unidades de voz identificadas y contribuyen tanto a la interacción del periodista con sus lectores como al posicionamiento epistemológico de dicho periodista con respecto de la información narrada. *Analysing Scientific Discourse from A Systemic Functional Linguistic Perspective*

Jing Hao, 2020-01-21 This book describes the discourse of biology from a systemic functional linguistic perspective. It offers a detailed description of resources based on text analysis. The description reveals co-textual patterns of language features their expressions through grammatical resources as well as their functions in the disciplinary context. The book also applies the description to analyse student texts in undergraduate biology revealing characteristics of language and knowledge development. Although the discussion in this book focuses on the discourse of biology both the language description and the descriptive principle can be used to inform the examination of knowledge in academic discourse in general making this key reading for students and researchers in systemic functional linguistics discourse analysis. English for academic purposes applied linguistics and science education
