Resilience and Food Security in a Food Systems Context Christophe Béné, Stephen Devereux, 2023-03-25 This open access book compiles a series of chapters written by internationally recognized experts known for their in depth but critical views on questions of resilience and food security The book assesses rigorously and critically the contribution of the concept of resilience in advancing our understanding and ability to design and implement development interventions in relation to food security and humanitarian crises For this the book departs from the narrow beaten tracks of agriculture and trade which have influenced the mainstream debate on food security for nearly 60 years and adopts instead a wider more holistic perspective framed around food systems The foundation for this new approach is the recognition that in the current post globalization era the food and nutritional security of the world s population no longer depends just on the performance of agriculture and policies on trade but rather on the capacity of the entire food system to produce process transport and distribute safe affordable and nutritious food for all in ways that remain environmentally sustainable In that context adopting a food system perspective provides a more appropriate frame as it incites to broaden the conventional thinking and to acknowledge the systemic nature of the different processes and actors involved This book is written for a large audience from academics to policymakers students to practitioners This is an open access book **L'histoire de l'Inra, entre**

Agronomes et innovations, 2006-09-01 Comment faut-il intégrer le local et le global dans les processus de gestion et de décision Comment doit-on renforcer et développer les capacités d'innovation des acteurs Quelles nouvelles relations peut-on imaginer entre les structures de recherche et de développement Quelle est la nature la limitation des risques et les responsabilités liées à l'implication des agronomes dans le changement Quels sont les nouveaux besoins de recherche Les contours de la discipline agronomique doivent-ils être revus

Histoire et agronomie Paul Robin, Jean-Paul Aeschlimann, Christian Feller, 2007 Au cours des deux derniers siècles le champ des agronomies a traversé par de nombreuses révolutions qui ont constitué autant de ruptures importantes Alors que ces disciplines se trouvent aujourd'hui face à l'émergence de nouveaux paradigmes comme celui du développement durable il était important d'amener agronomes et historiens confronter leurs savoirs pour mieux analyser les changements sociaux et techniques qui ont découlé de ces ruptures Si pour l'historien les ruptures s'inscrivent essentiellement dans la durée pour l'agronome elles répondent davantage des questions pratiques de production et de protection des espaces naturels Et les sciences de l'agronomie ont beaucoup gagné en intégrant le regard des historiens leurs propres perceptions des hommes des concepts et des techniques Cet ouvrage présente le résultat des réflexions croisées de quelque trente spécialistes européens de ces deux disciplines réunis à Montpellier deux cents ans après la parution du travail fondateur de Nicolas-Thodore de Saussure 1804

consommer des biens agricoles et alimentaires dans une perspective vertueuse L'écologie des autres Philippe Descola, 2016-05-02 Philippe Descola propose ici une écologie des relations entre humains et non humains c'est en acceptant de renoncer son anthropocentrisme que l'anthropologie pourra résoudre les débats toujours recommencés entre déterminismes naturels et culturels **Expérimentation animale, entre droit et liberté** Jean-Pierre Marguénaud, 2011-05-11 L'expérimentation animale passe généralement pour être indispensable au progrès de la science et par conséquent au bonheur de l'humanité. Aussi a-t-elle été abandonnée jusqu'en 1968 la liberté la plus absolue. Cependant le droit poussé par l'évolution des mœurs et des idées s'infiltrait partout et l'expérimentation animale n'échappait plus son influence. La nouvelle directive de l'Union européenne du 22 septembre 2010 relative à la protection des animaux utilisés des fins scientifiques dont les principaux effets se feront sentir à partir de 2013 a suscité sur de nombreux points les associations de protection des animaux. Elle marque pourtant une nouvelle conquête du droit en créant les conditions de sa substitution éthique sur laquelle jusqu'alors reposait essentiellement la protection des animaux destinés à l'expérimentation.
