## **Manual De Laboratorio De Bioseparaciones:**

*Procesos de separación de biotecnología industrial* Francisco Javier Recasens Baxarías, 2018-02-15 La biotecnología moderna se basa en la ingeniería genética pero sin los procesos posteriores de separación y purificación a escala de producción ningún bioproducto puede llegar a ser una realidad comercial. Este libro es el resultado de la experiencia del autor en la docencia y el desarrollo experimental de procesos en la industria y la universidad. Se estudian en este libro los procesos de filtración, disruptión celular, centrifugación, precipitación, flocculación, extracción, adsorción, desorción, cromatografía, cristalización y secado aplicados a las industrias biotecnológicas, haciendo énfasis en los fundamentos y en el cambio de escala.
