

MANUEL DE TABLA DINÁMICA Y MACROS EN EXCEL

Crear una tabla dinámica para analizar datos de una hoja de cálculo

Una tabla dinámica es una herramienta avanzada para calcular, resumir y analizar datos que le permite ver comparaciones, patrones y tendencias en ellos.

Crear una tabla dinámica

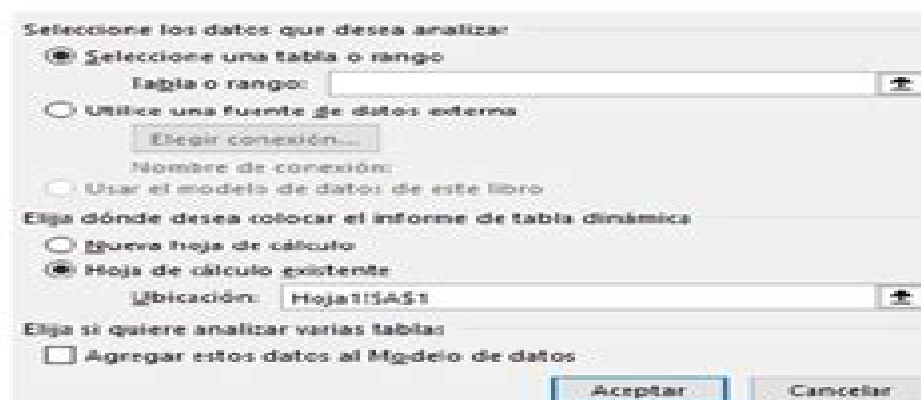

1. Seleccione las celdas a partir de las que quiera crear una tabla dinámica.

Nota: Los datos no deben tener filas o columnas vacías. Debe tener un encabezado de solo una fila.

2. Seleccione Insertar > Tabla dinámica.

3. En Seleccione los datos que desea analizar, haga clic en Seleccionar una tabla o rango.

The image shows the 'Seleccionar los datos que desea analizar' (Select the data you want to analyze) dialog box. It has three radio button options: 'Seleccionar una tabla o rango' (Select a table or range), 'Utilice una fuente de datos externa' (Use an external data source), and 'Usar el modelo de datos de este libro' (Use the data model in this book). The first option is selected. Below it is a text box for 'Tabla o rango:' with the value 'Hoja1!\$A\$1' and a selection icon. There is also a button 'Elegir conexión...' (Choose connection...). Below these are two radio button options for 'Elija dónde desea colocar el informe de tabla dinámica' (Choose where you want to place the dynamic table report): 'Nueva hoja de cálculo' (New worksheet) and 'Hoja de cálculo existente' (Existing worksheet). The second option is selected. Below it is a text box for 'Ubicación:' (Location) with the value 'Hoja1!\$A\$1' and a selection icon. At the bottom, there is a checkbox 'Elija si quiere analizar varias tablas' (Choose if you want to analyze multiple tables) which is unchecked, and a checkbox 'Agregar estos datos al Modelo de datos' (Add these data to the data model) which is also unchecked. At the bottom right are 'Aceptar' (OK) and 'Cancelar' (Cancel) buttons.

Manual De Tabla Dinamica
