Josh throws a ball into the air with an initial upward velocity of 48 feet/second. Its heights (h) in feet after t seconds is given by the function $h = -16t^2 + 48t + 4$

Height \nearrow \nwarrow Time \nwarrow velocity \nwarrow
y-int / Initial height

Vertex:
(1.5, 40)

Zeros:
 $x = \cancel{-0.08}$
 $x = 3.08$

y-int:
(0, 4)

Can't have negative time.

1. In how many seconds will the ball reach its maximum height? 1.5 seconds (x-value of vertex)
2. What is the ball's maximum height? 40 feet (y-value of vertex)
3. How long for the ball to hit the ground? 3.08 seconds (height = 0)
4. What will the height, in feet, of the ball be after 2 seconds? 36 feet ($t = 2$)

Building Intelligent Interactive Tutors Beverly Park Woolf, 2010-07-28 Building Intelligent Interactive Tutors discusses educational systems that assess a student's knowledge and are adaptive to a student's learning needs. The impact of computers has not been generally felt in education due to lack of hardware, teacher training, and sophisticated software, and because current instructional software is neither truly responsive to student needs nor flexible enough to emulate teaching. Dr. Woolf taps into 20 years of research on intelligent tutors to bring designers and developers a broad range of issues and methods that produce the best intelligent learning environments possible, whether for classroom or life-long learning. The book describes multidisciplinary approaches to using computers for teaching, reports on research development and real-world experiences, and discusses intelligent tutors, web-based learning systems, adaptive learning systems, intelligent agents, and intelligent multimedia. It is recommended for professionals, graduate students, and others in computer science and educational technology who are developing online tutoring systems to support e-learning and who want to build intelligence into the system. Combines both theory and practice to offer most in-depth and up-to-date treatment of intelligent tutoring systems available. Presents powerful drivers of virtual teaching systems, including cognitive science, artificial intelligence, and the Internet. Features algorithmic material that enables programmers and researchers to design building components and intelligent systems. *Mathematics Catalog 2005* Neil Thomson, 2004-10 [Navigating MathLand](#) Linda Kasal Fusco, 2017-06-21 Navigating MathLand uses a unique lens to focus on how students prefer to learn mathematics. The intent of this book is to provide a guide for parents to help them navigate the thirteen years of their children's math education, K-12. The book will provide parents with the knowledge and skills they will need to proactively advocate for their children's preparation for the 21st-century workforce. **American Book Publishing Record Cumulative, 1876-1949** R.R.
