

## Unit 1: Language As A System.

---

A semiotic system is a set of rules that surround a method of communication for a specific group of people including different signs and symbols. The individual signs and symbols do not carry a lot of meaning on their own but when combined in specific order these signs or symbols (like the alphabet letters) start making sense and meaning is added. It is the theory of signs and the analysis of systems using signs or signals for the purpose of communication (semiotic systems). The most important semiotic system is human language but there are other systems as well such as Morse code, traffic signals and sign language.

To understand and appreciate a given work, the reader must be aware of:

- The language in which the text is expressed; the language used by the reader;
- The literary forms and/or conventions which are reflected in the text;
- The particular culture within which the text was created;
- The particular culture within which the reader exists;

**The icon:**

The simplest sign as it is a pattern that physically resembles what it stands for. For example: a picture of your face is an icon of you, the square with a picture of a printer on your computer screen is an icon for the print function and a picture of a cigarette with a line drawn through it is an icon that represents 'Do not smoke here!'

**The index:**

This sign is defined by a sensory feature. Something that is directly visible, audible, can be smelt or touched that has a relationship with or points to something else. For example: dark clouds in the sky are indexical of a storm coming, a scowling facial expression is an index of displeasure or a sounding alarm is an index of an emergency situation.

More examples: the 'ping' of your microwave is a sign/signal that your food is ready; a red robot indicates that you must stop and someone waving their hand at you is indexical of recognition and greeting.

**The symbol:**

A symbol can be a mark or character that represents an object, function or process. For example: the letters on the periodic table that represent the different elements or characters in musical notation. A symbol represents or stands for something else.

Other examples: the bald eagle as a symbol of the spirit of the American people, the cross as a symbol of Christianity, the protea on the South African coat of arms as a symbol of the harmony of cultures and the flowering and growth of our nation.

**5 reasons to study English language and literature:**
