Shaping Images Thorsten Stephan Beck,2016-09-12 Images play an outstanding role in the transfer of knowledge They are used in numerous academic disciplines to present scientific results Digital tools such as Adobe Photoshop make it possible to display the information in images brilliantly and clearly at the same time the line between appropriate and inappropriate manipulation is not always easy to draw Scientific journals have published guidelines for handling and editing images but they are not always specific enough to provide clarity for all situations *Shaping Images* examines how scholars from biology information science art history and design deal with this uncertainty how they process and manipulate images where they see their special potential and how they draw the line between appropriate and inappropriate image manipulation The work also looks at scientific journals and lets selected editors have their say What would have to happen to make it possible to combat image manipulation in science more effectively The book s interdisciplinary approach makes it clear how different the practices are and how different the views are on what should be allowed in the processing of images Images this too is problematized in the book are always a means to a certain end which is precisely why the handling of images should be thoroughly reflected

Advances in Groundwater Pollution Control and Remediation Mustafa Aral ARAL, 2013-11-11 In the past decades environmental scientists economists and physicists have been juggling critical issues within environmental strategies and environmental management styles in order to find a feasible medium between limited resources long term demands and objectives and interest groups In the search for best management alternatives practice has undergone a pendulum swing between stages that can be characterised as frontier economics radical environmentalism resource management allocation selective environmentalism and sustainable environmental management The next stage of

management must answer such questions as Can there be a global uniform environmental strategy or Based on their characteristics can different issues different regions and different applications have unique environmental strategies Based on this premise the next stage of management may be identified as risk based sustainable environmental management The goal of this style will be the risk based long term harmonious management of economic resources and environmental preservation for health safety and prosperity of sustainable populations When evaluation of risk or risk based ranking of management alternatives enter the picture as part of the overall puzzle then social policy ethics and health issues assume a very important role in the management strategy Economic incentives and environmental constraints have to be considered harmoniously the main emphasis being placed on protection and preservation of human health and the long term sustaining of populations
