

Geometric Terms

A point is an exact location in space or a flat surface

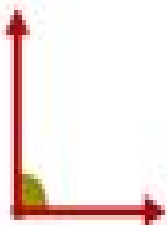

A line is a collection of points that continues forever in both directions

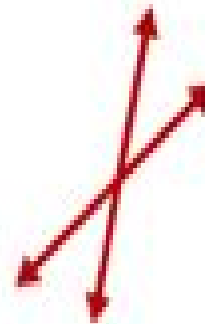

A line segment is a part of a line with two endpoints

A ray starts from one point and extends in one direction forever

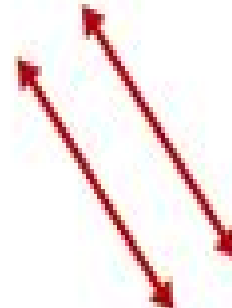

An angle is formed when two rays share an endpoint

Intersecting lines are lines that pass through the same point

Perpendicular lines are lines that intersect at right angles

Parallel lines are lines that never intersect
