Chapter 3

Lesson 3-1

Use the cube to name each of the following.

- all lines that are parallel to \overleftrightarrow{BC} **$\overleftrightarrow{AD}, \overleftrightarrow{EH}, \overleftrightarrow{FG}$**
- a pair of parallel planes **sample answers: plane ABC and plane EFG , or plane AEH and plane BCG**
- two lines that are skew to \overleftrightarrow{AE} **sample answer: $\overleftrightarrow{BC}, \overleftrightarrow{HG}$**

Identify all pairs of each type of angles in the diagram.

Name the two lines and the transversal that form each pair.

- corresponding angles **$\angle 5$ and $\angle 7$; d, e , and b**
- alternate interior angles **$\angle 1$ and $\angle 3$; b, c , and $a, \angle 2$ and $\angle 4$; d, e , and a**
- same-side interior angles **$\angle 7$ and $\angle 8$; b, c , and d**
- alternate exterior angles **$\angle 6$ and $\angle 7$; d, e , and b**

Lesson 3-2

Find $m\angle 1$ and $m\angle 2$. State the theorems or postulates that justify your answers.

**$m\angle 1 = 134$; Same-Side Int. \angle Thm.
 $m\angle 2 = 46$; Alt. Int. \angle Thm.**

**$m\angle 1 = 125$; Corr. \angle Post.
 $m\angle 2 = 55$; Same-Side Int. \angle Thm.**

**$m\angle 1 = 58$; Alt. Int. \angle Thm.
 $m\angle 2 = 122$; Same-Side Int. \angle Thm.**

**$m\angle 1 = 64$; Alt. Int. \angle Thm.
 $m\angle 2 = 116$; Same-Side Int. \angle Thm.**

**$m\angle 1 = 103$; Corr. \angle Post.
 $m\angle 2 = 103$; Alt. Ext. \angle Thm.**

**$m\angle 1 = 82$; Same-Side Int. \angle Thm.
 $m\angle 2 = 82$; Alt. Ext. \angle Thm.**

Find the value of each variable. Then find the measure of each labeled angle.

$x = 45$, $x + 15 = 2x - 30 = 60$

**$x = 62$, $(3x - 44) = 142$,
 $(x - 24) = 38$**

**$x = 17$, $y = 35$;
 $5x = (3x + 34) = 85$,
 $2y = (2y - 35) = 70$**

The Myth of Achievement Tests James J. Heckman, John Eric Humphries, Tim Kautz, 2014-01-14 Achievement tests play an important role in modern societies They are used to evaluate schools to assign students to tracks within schools and to identify weaknesses in student knowledge The GED is an achievement test used to grant the status of high school graduate to anyone who passes it GED recipients currently account for 12 percent of all high school credentials issued each year in the United States But do achievement tests predict success in life The Myth of Achievement Tests shows that achievement tests like the GED fail to measure important life skills James J Heckman John Eric Humphries Tim Kautz and a group of scholars offer an in depth exploration of how the GED came to be used throughout the United States and why our reliance on it is dangerous Drawing on decades of research the authors show that while GED recipients score as well on achievement tests as high school graduates who do not enroll in college high school graduates vastly outperform GED recipients in terms of their earnings employment opportunities educational attainment and health The authors show that the differences in success between GED recipients and high school graduates are driven by character skills Achievement tests like the GED do not adequately capture character skills like conscientiousness perseverance sociability and curiosity These skills are important in predicting a variety of life outcomes They can be measured and they can be taught Using the GED as a case study the authors explore what achievement tests miss and show the dangers of an educational system based on them They call for a return to an emphasis on character in our schools our systems of accountability and our national dialogue Contributors Eric Grodsky University of Wisconsin Madison Andrew Halpern Manners Indiana University Bloomington Paul A LaFontaine Federal Communications Commission Janice H Laurence Temple University Lois M Quinn University of Wisconsin Milwaukee Pedro L Rodr guez Institute of Advanced Studies in Administration John Robert Warren University of Minnesota Twin Cities

Test Fairness in the New Generation of Large-Scale Assessment Hong Jiao, Robert W. Lissitz, 2017-06-01 The new generation of tests is faced with new challenges In the K 12 setting the new learning targets are intended to assess higher order thinking skills and prepare students to be ready for college and career and to keep American students competitive with their international peers In addition the new generation of state tests requires the use of technology in item delivery and embedding assessment in real world authentic situations It further requires accurate assessment of students at all ability levels One of the most important questions is how

to maintain test fairness in the new assessments with technology innovative items and technology delivered tests In the traditional testing programs such as licensure and certification tests and college admission tests test fairness has constantly been a key psychometric issue in test development and this continues to be the case with the national testing programs As test fairness needs to be addressed throughout the whole process of test development experts from state admission and licensure tests will address test fairness challenges in the new generation assessment The book chapters clarify misconceptions of test fairness including the use of admission test results in cohort comparison the use of international assessment results in trend evaluation whether standardization and fairness necessarily mean uniformity when test takers have different cultural backgrounds and whether standardization can insure fairness More technically chapters also address issues related to how compromised items and test fairness are related to classification decisions how accessibility in item development and accommodation could be mingled with technology how to assess special populations with dyslexia using Blinder Oaxaca Decomposition for differential item functioning detection and differential feature functioning in automated scoring Overall this book addresses test fairness issues in state assessment college admission testing international assessment and licensure tests Fairness is discussed in the context of culture and special populations Further fairness related to performance assessment and automated scoring is a focus as well This book provides a very good source of information related to test fairness issues in test development in the new generation of assessment where technology is highly involved
