The Voice of the Indian Mona Lisa Heidi Rika Maria Pauwels, 2023-08-31 The Indian Mona Lisa is an eighteenth century portrait of the goddess Radha from the Kishangarh school of Rajput Painting It was purportedly modelled after a young enslaved woman and court performer Ban han who became a concubine of the patron of the painting crown prince Savant Singh Tracing her career Heidi Pauwels recovers her role as a composer of devotional songs in multiple registers of Classical Hindi and shows how she was a conduit for trend setting styles from Delhi including the new vogue of Urdu Through a combination of literary historical and art historical analysis she brings to life the vibrant cultural production center of Kishangarh in the eighteenth century by reconstructing how Ban han came to be acclaimed as the devotional poetess Rasikbih r and as India s Mona Lisa This major new study conveys important new insights in the history of Hindi literature and devotion the family palace women and the social mobility of the enslaved

Was Mona Lisa Created by Physicochemical Reactions Alone? Nickolas Dorfman, 2008-09 In this book the author is trying to explain some unique phenomena of the Nature using scientific data speculations logic and fantasy The main point of this book is to show that the mainstream science is going to deep into physics and chemistry limiting science to only molecules and energy and dismissing any spiritual ideas A simple logic can clearly indicate that inanimate molecules and energy just cannot be so smart to create numerous masterpieces of human civilization We should not ignore the fact that there is something very fundamental in the Universe that we still know nothing about Short sightedness of materialistic views will never let us approach the secret of human mind We can discover millions of new genes and get knowledge of zillions new biochemical reactions but all these will never let us know how Mona Lisa was created or how inanimate molecules in human brain could build space crafts and send sophisticated robots into space to investigate the secrets of Mother Nature This book cannot give you all answers but it could give you some new thoughts or ideas

Mona Lisa Donald Sassoon, 2001 What has made the Mona Lisa the most famous picture in the world Why is it that of all the 6 000 paintings in the Louvre it is the only one to be exhibited in a special box set in concrete and protected by two sheets of bulletproof glass Why do thousands of visitors throng to see it every day ignoring the masterpieces which surround it
