

Dollar Up Strategy:

The dollar up strategy is a way to pay for your items without having to calculate change. For example, if an item costs \$1.50, you round up to the nearest whole dollar, or \$2. If an item costs \$3.75, the nearest whole dollar is \$4.

Look at the cost of each item. Using the Dollar Up Strategy, write how much you will give to the cashier.

A Handbook of Geriatric Neuropsychology Shane S. Bush, Brian P. Yochim, 2022-07-12. *A Handbook of Geriatric Neuropsychology: Practice Essentials*, Second Edition, brings together experts in the field to integrate the knowledge and skills needed to understand and treat older adults who are experiencing problems with memory and other thinking skills. With three new sections including coverage of other conditions beyond neuropsychological disorders, special assessment contexts, and more on interventions and ethics, as well as multiple new chapters and significant updates from the first edition, this book provides a strong foundation for clinicians, educators, and researchers invested in the wellbeing of older adults. The impact and experience of aging, like the practice of neuropsychology, evolves over time. Similarly, through advances in science and professional techniques, neuropsychological practice has continued to evolve. Neuropsychological evaluation remains the most effective method of diagnosing age-related cognitive decline, cognitive difficulties that result from psychological factors, and other related disorders, as well as determining how the various disorders impact functioning and quality of life. This book explores these areas and offers state-of-the-art assessment techniques to assess changes in cognition and behavior and to distinguish normal changes from neuropathology. This book is a go-to resource and key reference for psychologists who serve older adults with known or suspected cognitive problems, as well as those who are invested in promoting brain wellness. It provides much of the information needed to establish and improve foundational and functional competencies in geriatric neuropsychology and establish practices that are personally and professionally rewarding, all aimed at promoting the understanding and wellbeing of older adults.
