Student Exploration: Seasons: Earth, Moon, and Sun

Readability: science, earth, astronomy, seasons, moon, rotation, revolution, related content

Prior Knowledge Questions: (Do these BEFORE using the Game.)

- Supposed you were stranded on the international airport as everyone is there. How would you know which way is north, or a particular season? I don't know. I would just wait till the sun is visible, and then, I would walk in whatever direction it was and the sun would turn.
- How could you determine all your time? if it showed a watch.

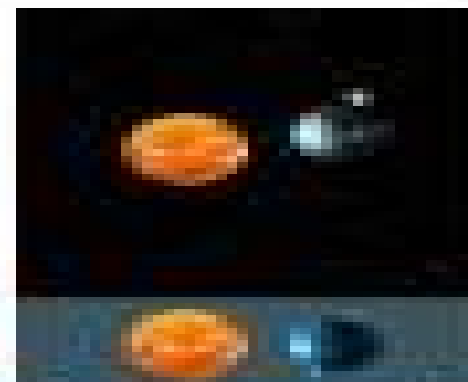

Game Play:

Thousands of years ago, people were already looking at the sky. They noticed that the stars, planets, and constellations all move and that the seasons, weather, and day/night patterns changed. How does it go about? How does it work? How does it work?

In the Seasons: Earth, Moon, and Sun Game, you will learn how the sun and moon move and how the seasons, weather, and day/night patterns change.

Play the Simulation again when all the day/night patterns, the sun, and the moon are visible.

- What happens? The Earth is rotating.
- What does the sun look like when it is visible? The sun looks like a ball, like a ball.
- What does the moon look like when it is visible? The moon looks like a ball, like a ball.
- What does the moon look like when it is visible? nothing, nothing, nothing.
