Moral Rhetoric and the Criminalisation of Squatting Lorna Fox O'Mahony, David O'Mahony, Robin Hickey, 2014-10-24 This collection of critical essays considers the criminalisation of squatting from a range of different theoretical policy and practice perspectives While the practice of squatting has long been criminalised in some jurisdictions the last few years have witnessed the emergence of a newly constituted political concern with unlawful occupation of land With initiatives to address the threat of squatting sweeping across Europe the offence of squatting in a residential building was created in England in 2012 This development which has attracted a large measure of media attention has been widely regarded as a controversial policy departure with many commentators Parliamentarians and professional organisations arguing that its support is premised on misunderstandings of the current law and a precarious evidence base concerning the nature and prevalence of squatting *Moral Rhetoric and the Criminalisation of Squatting* explores the significance of measures to criminalise squatting for squatters owners and communities The book also interrogates wider themes that draw on political philosophy social policy criminal justice and the nature of ownership to consider how the assimilation of squatting to a contemporary punitive turn is shaping the political social legal and moral landscapes of property housing and crime

Squatting and the State Lorna Fox O'Mahony, Marc L. Roark, 2022-08-25 This book offers a fresh theoretical approach and methodology for tackling the most pressing property problems of our time

Squatting London Samuel Burgum, 2024-12-20 Timely and urgent challenges how we come to think about property and homeownership while reminding us that there are other ways of inhabiting and transforming the city Alexander Vasudevan author of *The Autonomous City* The generative power of squatting lies at the core of Burgum's beautiful book Michele Lancione author of *For a Liberatory Politics of Home* Homes without

people people without homes This book demonstrates that squatting is not just the correction of this unfair mathematics but also the creation of collectivity in a context of dispossession Raquel Rolnik author of *Urban Warfare Who deserves space Who is entitled to home* In a powerful and subversive account Sam Burgum opens up the political space of the city as he takes us inside London's squats Nicholas Blomley Professor of Geography Simon Fraser University *Squatting in London* has a rich and diverse history Today squatters live a marginalised and criminalised existence yet they persist Behind the glittering facade London is a network of vacant offices boarded up shops and dilapidated pubs that host some of the city's poorest and most determined citizens exiled and increasingly pushed to the margins This is an account of the ambitions and struggles of the city's squatters Squatting is a challenge to the logic of property so squats are by nature political acts They sit in direct opposition to the speculation gentrification and regeneration that controls London today From office blocks transformed into a life saving homeless shelter to temporary art exhibitions mutual aid networks restaurants shops offices and pubs Squatting London is a first hand account of the alternative underground and rebellious city you thought you already knew Sam Burgum is an urban sociologist and the author of *Occupying London Post Crash Resistance and the Limits of Possibility* **The Urban Politics of Squatters' Movements** Miguel A. Martínez López, 2017-11-27 This volume sheds light on the development of squatting practices and movements in nine European cities Madrid Barcelona Seville Rome Paris Berlin Copenhagen Rotterdam and Brighton by examining the numbers variations and significant contexts in their life course It reveals how and why squatting practices have shifted and to what extent they engender urban movements The book measures the volume and changes in squatting over various decades mostly by focusing on Squatted Social Centres but also including squatted housing In addition it systematically compares the cycles socio spatial structures and the political implications of squatting in selected cities This collection highlights how squatters movements have persisted over more than four decades through different trajectories and circumstances especially in relation to broader protest cycles and reveals how political opportunities and constraints influence the conflicts around the legalisation of squats p *The Politics of Dependence* Patrick J. L. Cockburn, 2018-05-08 The central claim of this book is that the dichotomy between economic dependence and economic independence is completely inadequate for describing the political challenges faced by contemporary capitalist welfare states The simplistic contrast between markets and states as sources of income renders invisible the relations of dependence established in our basic economic institutions such as the family property and money This book is a work of political theory that attacks narrow conceptions of dependence and identifies distinct senses of dependence that might allow political communities to make clearer decisions about the justice of our economic institutions and practices Inheritance for example is as much a form of dependence as support by a welfare state but these are never compared in debates about economic justice This book begins the work of comparing forms of economic dependence and argues that economic dependence is always an issue of both vulnerability and parasitism It builds bridges between political

theory and social science and is of relevance to those concerned with social and economic justice in and beyond contemporary capitalist welfare states The Routledge Handbook of Property, Law and Society Nicole Graham, Margaret Davies, Lee Godden, 2022-11-14 This handbook brings together diverse perspectives major topics and multiple approaches to one of the biggest legal institutions in society property Property touches on many fundamental human questions It involves decisions about power economy morality work and ecology It also involves ideas about where humans fit in the world and how humans relate to more than human life This book will ask in myriad ways such questions as what property means what kinds of property there are what is and should be the relationship between owned and owner and what is the impact of different forms of property on life in this world Drawing on a range of socio legal and empirical methodologies renowned scholars and rising stars in property from around the world present current issues and map future directions in research Coming from the place of law but reaching out through cognate disciplines this handbook provides a comprehensive and accessible survey of current research at the interface of property society and the environment This handbook will appeal to students and researchers across a range of disciplines including law sociology geography history and economics

Squatters in the Capitalist City Miguel Martinez, 2019-08-30 To date there has been no comprehensive analysis of the disperse research on the squatters movement in Europe In *Squatters in the Capitalist City* Miguel A Mart nez L pez presents a critical review of the current research on squatting and of the historical development of the movements in European cities according to their major social political and spatial dimensions Comparing cities contexts and the achievements of the squatters movements this book presents the view that squatting is not simply a set of isolated illegal and marginal practices but is a long lasting urban and transnational movement with significant and broad implications While intersecting with different housing struggles squatters face various aspects of urban politics and enhance the content of the movements claiming for a right to the city *Squatters in the Capitalist City* seeks to understand both the socio spatial and political conditions favourable to the emergence and development of squatting and the nature of the interactions between squatters authorities and property owners by discussing the trajectory features and limitations of squatting as a potential radicalisation of urban democracy The Ethics of Space Steph Grohmann, 2020-03-01 Across the Western world full membership of society is established through entitlements to space and formalized in the institutions of property and citizenship Those without such entitlements are deemed less than fully human as they struggle to find a place where they can symbolically and physically exist Written by an anthropologist who accidentally found herself homeless *The Ethics of Space* is an unprecedented account of what happens when homeless people organize to occupy abandoned properties Set against the backdrop of economic crisis austerity and a disintegrating British state Steph Grohmann tells the story of a flourishing squatter community in the city of Bristol and how it was eventually outlawed by the state The first ethnography of homelessness done by a researcher who was formally homeless throughout fieldwork this volume explores the intersection

between spatial existence subjectivity and ethics The result is a book that rethinks how ethical views are shaped and constructed through our own spatial existences Great Debates in Land Law David Cowan,Lorna Fox O'Mahony,Neil Cobb,2023-04-20 While there are plenty of land law textbooks on the market there is in general an absence of critical texts designed for law students to deepen their understanding of the subject Great Debates in Land Law provides students with the contextual and critical aspects of this exciting topic Each chapter introduces topics for debate such as Is tenancy a property or a personal right and goes on to include features such as boxed discursive notes from the authors important cases and suggestions for further reading The Great Debates series provides engaging and accessible analysis of the more advanced legal concepts For books in the major taught subjects such as land law the series is designed for use by ambitious students alongside a main course textbook For books addressing subjects that are less often taught such as family law the series provides a clear and critical exposition of the key areas of debate By focussing on particular questions and tensions underlying a subject Great Debates titles encourage students to think critically analyse a topic and gain additional insights These skills and the discursive nature of the series with an emphasis on contentious topics are also useful for students when preparing their dissertations **When Students Protest** Judith Bessant,Analia Mejia Mesinas,Sarah Pickard,2021-08-11 Student political action has been a major and recurring feature of politics across the globe throughout the past century Students have been involved in a full range of public issues from anti colonial movements anti war campaigns civil rights and pro democracy movements to campaigns against neoliberal policies austerity racism misogyny and calls for climate change action Yet their actions are frequently dismissed by political elites and others as adolescent mischief or manipulation of young people by duplicitous adults This occurs even as many working in governments traditional media and educational organisations attempt to suppress student movements Moreover much of mainstream scholarly work has deemed student politics as unworthy of intellectual attention These three edited volumes of books help set the record straight Written by scholars and activists from around the world When Students Protest Universities in the Global North is the third in this three volume study that explores university student politics in the global north Authors explore university and college student political action especially over the past decade It is just over fifty years since May 1968 when student protests erupted at Universit Paris Nanterre in France and then spread across the globe Contributors to this book demonstrate that despite repeated attempts by states power elites and institutions to suppress and even criminalise student political action student movements have always been part of the political landscape and remain a significant and potent source of political change and renewal *The Criminalisation of Social Policy in Neoliberal Societies* Elizabeth Kiely,Katharina Swirak,2022-11-15 From anti immigration agendas that criminalise vulnerable populations to the punishment of the poor and the governance of parenting this timely book explores how diverse fields of social policy intersect more deeply than ever with crime control and in so doing deploy troubling strategies The international context of this book is complemented by the inclusion of specific

policy examples across the themes of work and welfare borders and migration family policy homelessness and the reintegration of justice involved persons This book incites the reader to consider how we can reclaim the best of the social in social policy for the twenty first century *Urban Change and Citizenship in Times of Crisis* Bryan S. Turner, Hannah Wolf, Gregor Fitzi, Jürgen Mackert, 2020-04-07 At times of triumphant neo liberalism cities increasingly become objects of financial speculation Formally social and political rights might not be abolished yet factually they have become inaccessible for large parts of the population The contributions gathered in this volume shed light on the clash between the perspectives of restructuring and reordering urban environments in the interest of investors and the manifold and innovative agencies of resistance that claim and stand up for the rights of urban citizenship Renewed waves of urban transformation employ state coercion to foster the expulsion of poor and marginalised inhabitants from those urban spaces that attract interest from speculators The intervention of state agencies triggers the work of hegemonic culture for reframing the housing issue and implementing moral and political legitimation as well as legislation that restricts urban citizenship rights The case studies of the volume comparatively show the different and sometimes contradictory patterns of these conflicts in Berlin Sydney Belfast Jerusalem Amsterdam and Istanbul as well as in metropolises of Latin America and China Innovative resistance agencies emerge that paint possible paths for the re establishment of the right to the city as the core of urban citizenship **Protest, Property and the Commons** Lucy Finchett-Maddock, 2016-03-17 Protest Property and the Commons focuses on the alternative property narratives of social centres or political squats and how the spaces and their communities create their own resistant form of law Drawing on critical legal theory legal pluralism legal geography poststructuralism and new materialism the book considers how protest movements both use state law and create new more informal legalities in order to forge a practice of resistance Invaluable for anyone working within the area of informal property in land commons protest and adverse possession this book offers a ground breaking account of the integral role of time space and performance in the instituting processes of law and resistance **Beyond the Neoliberal Creative City** Robert G. Hollands, 2024-10-15 A buoyant creative economy can be seen as the saviour of many cities but behind such urban makeovers lie serious problems such as widening inequalities and gentrification Blending lively city case studies with broader theoretical debates this book explores the opportunities for a more just and sustainable urban future **Routledge Handbook of Contemporary European Social Movements** Cristina Flesher Fominaya, Ramon Feenstra, 2019-11-27 European social movements have become increasingly visible in recent years generating intense public debates From anti austerity and pro democracy movements to right wing nationalist movements these movements expose core conflicts around European democracy identity politics and society The Routledge Handbook of Contemporary European Social Movements offers a comprehensive interdisciplinary overview of the analysis of European social movements helping to orient scholars and students navigating a rapidly evolving field while developing a new agenda for research in the area The book is divided into eight sections Visions

Contested Property Claims Maja Hojer Bruun, Patrick Joseph Cockburn, Bjarke Skærlund Risager, Mikkel

Thorup, 2017-12-01 Property relations are such a common feature of social life that the complexity of the web of laws practices and ideas that allow a property regime to function smoothly are often forgotten But we are quickly reminded of this

complexity when conflict over property erupts When social actors confront a property regime for example by squatting they enact what can be called contested property claims As this book demonstrates these confrontations raise crucial issues of social justice and show the ways in which property conflicts often reflect wider social conflicts Through a series of case studies from across the globe this multidisciplinary anthology brings together works from anthropologists legal scholars and geographers who show how exploring contested property claims offers a privileged window onto how property regimes function as well as an illustration of the many ways that the institution of property shapes power relationships today

Geographies of Forced Eviction Katherine Brickell, Melissa Fernández Arrigoitia, Alexander Vasudevan, 2017-01-09 This book offers a close look at forced evictions drawing on empirical studies and conceptual frameworks from both the Global North and South It draws attention to arenas where multiple logics of urban dispossession violence and insecurity are manifest and where wider socio economic political and legal struggles converge The authors highlight the need to apply emotional and affective registers of dispossession and insecurity to the socio political and financial economies driving forced evictions across geographic scales The chapters each consider the distinct urban logics of precarious housing or involuntary displacements that stretch across London Barcelona Rio de Janeiro Shanghai and Colombo A timely addition to existing literature on urban studies this collection will be of great interest to policy makers and scholars of human geography development studies and sociology

Ours to Lose Amy Starecheski, 2016-11-07 The fascinating and little known tale of the Lower East Side squatters of the Eighties a radical European inspired housing movement The Village Voice Though New York s Lower East Side today is home to high end condos and hip restaurants it was for decades an infamous site of blight open air drug dealing and class conflict an emblematic example of the tattered state of 1970s and 80s Manhattan Those decades of strife however also gave the Lower East Side something unusual a radical movement that blended urban homesteading and European style squatting in a way never before seen in the United States Ours to Lose tells the oral history of that movement through a close look at a diverse group of Lower East Side squatters who occupied abandoned city owned buildings in the 1980s fought to keep them for decades and eventually began a long complicated process to turn their illegal occupancy into legal cooperative ownership Amy Starecheski here not only tells a little known New York story she also shows how property shapes our sense of ourselves as social beings and explores the ethics of homeownership and debt in post recession America There are many books about the Lower East Side and its recent transformation yet none has included engagement or oral history with primary organizers in the way Starecheski has Ours to Lose is a unique and substantive contribution to our understanding of a most distinct practice in the shaping of urban space Metropolitiques What is significant is that the author demonstrates how some New Yorkers addressed the housing crisis in an unconventional manner Recommended Choice
