Charles E. Lance, Charles E. Lance, Robert J. Vandenberg, 2010-10-18 This book provides an up to date review of commonly undertaken methodological and statistical practices that are sustained in part upon sound rationale and justification and in part upon unfounded lore Some examples of these methodological urban legends as we refer to them in this book are characterized by manuscript critiques such as a your self report measures suffer from common method bias b your item to subject ratios are too low c you can't generalize these findings to the real world or d your effect sizes are too low Historically there is a kernel of truth to most of these legends but in many cases that truth has been long forgotten ignored or embellished beyond recognition This book examines several such legends Each chapter is organized to address a what the legend is that we almost all know to be true b what the kernel of truth is to each legend c what the myths are that have developed around this kernel of truth and d what the state of the practice should be This book meets an important need for the accumulation and integration of these methodological and statistical practices ECRM2014-Proceedings of the

Li, Barton Sharp, Donald D. Bergh, Robert Vandenberg, 2019 This paper examines whether methodological precedence in applying moderation analysis to strategic management research relies on myths and urban legends and if doing so affected empirical conclusions implications for theory development and practical recommendations An in depth analysis of 69 studies published in the *Strategic Management Journal* between 2000 and 2014 using moderation analysis finds that strategic management scholars typically rely on statistical myths and urban legends when applying moderation analysis including 1 interpreting main effects separately from their significant interaction with other variables 2 failing to report reliability values of interaction terms and 3 relying on hierarchical approaches that can lead to interpretation errors Further examples

illustrate how these practices could lead researchers to draw incomplete and possibly inaccurate conclusions Overall problematic precedents have become the gold standards for testing and interpreting moderation models Best practice recommendations for redirecting future research to more solid methodological grounding are provided Leading Issues in Leading Issues in Business and Management Research, Volume 2 Susan Geringer and John Mendy,2015 Research Methodology remains a vital issue at the heart of all scholarly activity Without a proper appreciation of Research Methodology and its correct application academic progress is not possible One of the problems which Research Methodology offers the learner is the very wide range of options which are frequently available with which to answer a research question and this high level of choice can lead to indecision and sometimes confusion This book is a compilation of a number of important papers on this subject selected by two leaders in this field of study A wide range of topic have been chosen which lead the reader through some of the more important considerations in the field The book is designed to help with this type of problem and the the current selection of papers which highlight a variety of research questions problems and issues and an accompanying range of research methods and methodological discussions Their authors have stated the research positions they have adopted and respective levels of justification and knowledge forms have been presented These range from those forms of knowledge that might be found of use to practitioners to those that are more philosophically or academically inclined A certain level of research impact is either implied or overtly presented in the selected papers This book is an important text for academics researchers and students as well as those interested in using research from a commercial point of view **The Routledge Companion to Entrepreneurship** Ted Baker,Friederike Welter,2014-09-15 Research in entrepreneurship has been booming with perspectives from a range of disciplines and numerous developing schools of thought It can be difficult for young scholars and even long time researchers to find their way through the lush garden of ideas we see before us The purpose of this book is to map the research terrain of entrepreneurship providing the perfect starting point for new and existing researchers looking to explore Topics covered range from emerging perspective through issues at the core of the field to innovative methodologies Starting off with a preface by Bill Gartner each section of the book brings together a world class set of established leading researchers and rising stars This considered comprehensive and conclusive companion integrates the recent debates in entrepreneurship research under one cover to provide a resource which will be useful across disciplinary boundaries and for a whole range of students and researchers The Sage Handbook of Survey Development and Application Lucy R. Anomalies in Net Present Value, Returns and Polynomials, and Regret Theory in Decision-Making Michael C. I. Nwogugu, 2017-06-09 This book explores why Modified Internal Rate of Return MIRR and Net Present Value NPV are not necessarily accurate or efficient tools for valuation and decision making The author specifically addresses the biases and framing effects inherent in the NPV MIRR IRR model and in related approaches such as Adjusted Present Value APV Net Future Value NFV and by extension Polynomials In doing so the book presents new ways of solving higher order polynomials using invariants and homomorphisms and explains why the Fundamental Theorem of Algebra the Binomial Theorem and the Descartes Sign Rule are unreliable Chapters also discuss how International Asset Pricing Theory IAPT and Intertemporal Capital Asset Pricing Models ICAPM can produce inaccurate results in certain circumstances The conditions under which ICAPM and IAPT may be accurate are described as well as why those conditions cannot or are unlikely to exist The conditions under which negative interest rates may exist or are justified are also outlined Moreover the author explains why traditional Consumption Savings Investment Production models of allocation can be inefficient and then introduces a new model of allocation that can be applied to individuals households and companies Finally the book explains why the Elasticity of Intertemporal Substitution is a flawed concept and introduces the Marginal Rate of Intertemporal Joint Substitution as a solution

Data, Methods and Theory in the Organizational Sciences Kevin R. Murphy, 2022-02-20 Data Methods and Theory in the Organizational Sciences explores the long term evolution and changing relationships between data methods and theory in the organizational sciences In the last 50 years theory has come to dominate research and scholarship in these fields yet the emergence of big data as well as the increasing use of archival data sets and meta analytic methods to test empirical hypotheses has upset this order This volume examines the evolving relationship between data methods and theory and suggests new ways of thinking about the role of each in the development and presentation of research in organizations This volume utilizes the latest thinking from experts in a wide range of fields on the topics of data methods and theory and uses this knowledge to explore the ways in which behavior in organizations has been studied This volume also argues that the current focus on theory is both unhealthy for the field and unsustainable and it provides more successful ways theory can be used to support and structure research and demonstrates the most effective techniques for analyzing and making sense of data This is an essential resource for researchers professionals and educators who are looking to rethink their current approaches to research and who are interested in creating more useful and more interpretable research in the organizational sciences
