No Time To Think Howard Rosenberg, Charles S. Feldman, 2008-10-01 An eviscerating look at the state of journalism in the age of the 24 hour news cycle by a Pulitzer Prize winning television critic and a veteran news correspondent No Time To Think

focuses on the insidious and increasing portion of the news media that due to the dangerously extreme speed at which it is produced is only half thought out half true and lazily repeated from anonymous sources interested in selling opinion and wild speculation as news These news item can easily gain exposure today assuming a life of their own while making a mockery of journalism and creating casualties of cool deliberation and thoughtful discourse Much of it is picked up gratuitously and given resonance online or through CNN Fox News MSNBC and other networks which must in this age of the 24 hour news cycle feed the beast In dissecting this frantic news blur No Time to Think breaks down a number of speed driven blunders from the insider perspective of Charles Feldman who spent 20 years as a CNN correspondent as well as the outsider perspective of Howard Rosenberg who covered the coverage for 25 years as TV critic for The Los Angeles Times No Time to Think demonstrates how today s media blitz scrambles the public s perspective in ways that potentially shape how we think act and react as a global society The end result effects not only the media and the public but also the government leaders we trust to make carefully considered decisions on our behalf Featuring interviews ranging from former NBC News anchor Tom Brokaw to internet doyenne Arianna Huffington to PBS stalwart Jim Lehrer to CNN chief Jonathan Klein to a host of former presidential press secretaries and other keen eyed media watchers this incisive work measures lasting fallout from the 24 hour news cycle beginning in 1980 with the arrival of CNN right up to the present *Time to Think Small* Todd Myers, 2022-11-01 This call to climate action examines ways we can leverage the growing power of smartphones and other technologies to become effective environmental stewards to protect threatened species reduce the risk from climate change and stop ocean plastic Personal technologies are creating what the Environmental Defense Fund calls a transformational shift in how we address environmental problems Time to Think Small explores how these brand new approaches are already playing a huge role in winning some of the most difficult and important environmental struggles of our day from fighting climate change to ensuring drinkable water for everyone to saving endangered animals to keeping plastic out of the ocean Learn how these technologies magnify and multiply the power everyone has as individuals to save our environment and how this tremendous power is not only growing but also has the huge benefit of being independent of sudden shifts in political leadership Drawing on two decades of environmental policy and a career working with endangered species mixed with his previous career in tech Myers looks at the different ways we can be empowered to find environmental solutions Time to Think Small reminds me of the first words spoken on the moon about small steps and giant leaps Todd Myers does in fact describe the giant strides from accumulated small steps that will help solve THE biggest long term problem facing humanity today If Big Government won t act WE CAN in our own small ways Donald Kroodsma Author of Birdsong for the Curious Naturalist The future of environmental stewardship depends on technology and innovation Todd Myers is a national leader on environmental policy and technology and understands how to create solutions that sidestep political gridlock John Connors former Microsoft CFO A much needed analysis of how we can solve complex global environmental problems by applying

human ingenuity and why every step matters along the way Benji Backer President American Conservation Coalition Addressing climate change can be such a polarizing issue Myers s book has found a way to cut right through that with practical applicable actions that everyone can take to make a difference Kevin Wilhelm CEO Sustainable Business Consulting While the positions taken by Todd Myers may be disconcerting to an old school environmentalist such as myself his voice is one we need to hear in the conversation about climate change Myers makes a compelling argument that thinking small stimulates creativity and that nimble creative approaches can play a crucial role in achieving sustainability John S Farnsworth PhD Author of Nature Beyond Solitude Notes from the Field **Journals of the Legislative Council of the Dominion of New Zealand** New Zealand.
