Machinery Buyers' Guide ,1997 Electronics and Industrial Policy Staffan Jacobsson,2012-12-06 There is a rapidly expanding literature on the economics of the so called new technologies especially on those using microelectronic systems Dr Jacobsson s book deals with microelectronics based innovation in machine tools with the production and use of computer numerically controlled machine tools in the world economy and especially in the Third World Jacobsson is mainly interested in the implications which CNC machine tools may be expected to have for users and producers in the Newly Industrialising Countries He approaches this as a problem in applied economics and the book will have a primary interest for those economists whose concern is with the problems of industrialisation in developing countries It will be particularly valuable to those who are preoccupied with the role of local capital goods manufacture and with the technological preconditions for this kind of production Jacobsson is able to give detailed and specific arguments on these matters as far as CNC machine tools are concerned In my view the book has a considerably wider interest and relevance than its specification may at first sight suggest Jacobsson s achievement is not just that he has provided valuable and convincing quantitative arguments about policy in setting up production of CNC machine tools In addition he has set a new and much needed methodological standard for analysis of the impacts of new technologies on the international economy Official Telephone Directory ,1989
