Morris Manual Handling:

Made in Sheffield Massimiliano Mollona, 2009-03-01 In 1900 Sheffield was the tenth largest city in the world Cutlery made in Sheffield was used across the globe and the city built armored plate for the navy in the run up to the First World War Today however Sheffield's derelict Victorian shop floors and industrial buildings are hidden behind new leisure developments and shopping centers Based on an extended period of research in two local steel factories this book combines a lively descriptive account with a wide ranging critique of post industrial capitalism Its central argument is that recent government attempts to engineer Britain's transition to a post industrial and classless society have instead created volatile post industrial spaces marked by informal labor industrial sweatshops and levels of risk and deprivation that divide citizens along lines of gender age and class The author discovers a link between production and reproduction and demonstrates the centrality of kinship relations child and female labor and intra household exchanges to the economic process of de industrialization Paradoxically government policies have reinvigorated working class militancy spawned local industrial clusters and re embedded the economy in the spatial and social structure of the neighborhood
