

GRADE 9 NATURAL SCIENCES NOVEMBER EXAMINATION

SECTION A QUESTION 1

1.1 Various options are provided as answers to the following questions. Choose the correct answer and write **ONLY** the LETTER(A-D) next to the QUESTION NUMBER (1.1.1-1.1.10) on your answer sheet, for example 1.1.1 D.

1.1.1 If cells are added in parallel the total voltage will...

- A Increase
- B Decrease
- C Remain the same
- D Increase then decrease

1.1.2 Why do we use copper in our house's wiring?

- A Good insulator
- B Good and-cheap conductor
- C Good, but-expensive conductor
- D Good and-cheap insulator

1.1.3 The energy conversion that takes place in a cell...

- A chemical → electrical → kinetic
- B electrical → chemical → kinetic
- C chemical → electrical
- D chemical → kinetic

1.1.4 Koeberg is this type of power station

- A Coal
- B Hydroelectricity
- C Nuclear
- D Solar

1.1.5 An example of a wet cell

- A torch
- B radio
- C car battery
- D toys

1.1.6 Example of converting wasted energy to useful energy

- A Filament lightbulbs
- B Heating elements
- C Buses
- D Electrical motors

1.1.7 As the altitude increases the ... will decrease

- A Temperature
- B Mass
- C Density
- D Distance

1.1.8 Which of the following is NOT a greenhouse gas?

- A CH₄
- B water vapour
- C H₂O
- D carbon dioxide

1.1.9 The reason why thicker wires offer lower resistance is...

- A there is less space for protons to move
- B there is more space for the protons to move
- C there is less space for the electrons to move
- D there is more space for the electrons to move

1.1.10 Factor that affects the magnitude of gravitational force

- A Mass
- B Weight
- C Height
- D None of the above

(10x3)

1.2 Provide the correct TERM for the following descriptions. Write **ONLY** the correct

TERM next to the QUESTION NUMBER (1.2.1-1.2.7) on your answer sheet.

1.2.1 Solution that can conduct electricity

The Recovery of Natural Environments in Architecture C. Alan Short, 2017-01-20 The Recovery of Natural Environments in Architecture challenges the modern practice of sealing up and mechanically cooling public scaled buildings in whichever climate and environment they are located This book unravels the extremely complex history of understanding and perception of air bad air miasmas airborne pathogens beneficial thermal conditions ideal climates and climate determinism It uncovers inventive and entirely viable attempts to design large buildings hospitals theatres and academic buildings through the 19th and early 20th centuries which use the configuration of the building itself and a shrewd understanding of the natural physics of airflow and fluid dynamics to make good comfortable interior spaces In exhuming these ideas and reinforcing them with contemporary scientific insight the book proposes a recovery of the lost art and science of making naturally conditioned buildings

Designing Emergency Management Wee-Kiat Lim, 2020-11-22 This book looks at the then nascent emergency management sector in China specifically the 2003 2012 period that arose from the 2003 SARS crisis and subsequently set the stage for its responses to the COVID 19 pandemic Covering not only the amended and new laws and regulations at the national level the book also includes the rearrangement and creation of the organizational structures as well as the response plans for individual emergencies that were either recrafted or created during this period Beyond chronicling the milestones and products of this transformation this book highlights the key ideas and ideals that guided the various stakeholders from the governing elites to the policy experts during this process The book demonstrates how definitions of emergency management and emergency categories as well as other ideational objects were initially either absent or weakly developed but were refined to the extent that they helped corral disparate actors into China's new organizational field of emergency management

Recoded City Thomas Ermacora, Lucy Bullivant, 2016-07-01 Recoded City examines alternative urban design planning and architecture for the other 90% namely the practice of participatory placemaking a burgeoning practice that co-author Thomas Ermacora terms recoding In combining bottom up and top down means of regenerating and rebalancing neighbourhoods affected by declining welfare or struck by disaster this growing movement brings greater resilience Recoded City sheds light on a new epoch in the

relationship between cities and civil society by presenting an emerging range of collaborative solutions and distributed governance models The authors draw on their own fresh research of global pioneers forging localist design strategies public realm interventions and new stakeholder dynamics As the world becomes increasingly digital and virtual a myriad of online tools and technological options is becoming available These give unprecedented co creation opportunities to communities and professionals alike yielding the benefits of a more open DIY society Because of its close engagement with people place and local identity the field of participatory placemaking has huge untapped potential Responding to the challenges of the Anthropocene era Recoded City is for decision makers developers and practitioners working globally to make better and more liveable cities

Emotional Agility Susan David,2016-09-06 1 Wall Street Journal Best Seller Winner of the Thinkers50 Breakthrough Idea Award Amazon Best Book of the Year Forbes Recommended Books for Leaders TED Talk sensation over 12 million views The counterintuitive approach to achieving your true potential heralded by the Harvard Business Review as a groundbreaking idea of the year The path to personal and professional fulfillment is rarely straight Ask anyone who has achieved his or her biggest goals or whose relationships thrive and you ll hear stories of many unexpected detours along the way What separates those who master these challenges and those who get derailed The answer is agility emotional agility Emotional agility is a revolutionary science based approach that allows us to navigate life s twists and turns with self acceptance clear sightedness and an open mind Renowned psychologist Susan David developed this concept after studying emotions happiness and achievement for more than twenty years She found that no matter how intelligent or creative people are or what type of personality they have it is how they

navigate their inner world their thoughts feelings and self talk that ultimately determines how successful they will become The way we respond to these internal experiences drives our actions careers relationships happiness health everything that matters in our lives As humans we are all prone to common hooks things like self doubt shame sadness fear or anger that can too easily steer us in the wrong direction Emotionally agile people are not immune to stresses and setbacks The key difference is that they know how to adapt aligning their actions with their values and making small but powerful changes that lead to a lifetime of growth Emotional agility is not about ignoring difficult emotions and thoughts it s about holding them loosely facing them courageously and compassionately and then moving past them to bring the best of yourself forward Drawing on her deep research decades of international consulting and her own experience overcoming adversity after losing her father at a young age David shows how anyone can thrive in an uncertain world by becoming more emotionally agile To guide us she shares four key concepts that allow us to acknowledge uncomfortable experiences while simultaneously detaching from them thereby allowing us to embrace our core values and adjust our actions so they can move us where we truly want to go Written with authority wit and empathy Emotional Agility serves as a road map for real behavioral change a new way of acting that will help you reach your full potential whoever you are and whatever you face *Integrating Disaster Science and Management* Pijush Samui,Dookie Kim,Chandan Ghosh,2018-05-04 Integrated Disaster Science and Management Global Case Studies in Mitigation and Recovery bridges the gap between scientific research on natural disasters and the practice of disaster management It examines natural hazards including earthquakes landslides and tsunamis and uses integrated disaster management techniques quantitative methods and big data analytics to create early warning models to mitigate impacts of these hazards and reduce the risk of disaster It also looks at mitigation as part of the recovery process after a disaster as in the case of the Nepal earthquake Edited by global experts in disaster management and engineering the book offers case studies that focus on the critical phases of disaster management Identifies advanced techniques and models based on natural disaster science for forecasting disasters and analyzing risk Offers a holistic approach to the problem of disaster management including preparation recovery and resilience Includes coverage of social economic and environmental impacts on disasters **Why Gender Matters, Second Edition** Leonard Sax, M.D., Ph.D.,2017-08-29 A revised and updated edition with more than 70% new material of the evergreen classic about the innate differences between boys and girls and how best to parent and teach girls and boys successfully with completely new chapters on sexual orientation and on transgender and intersex kids Eleven years ago Why Gender Matters broke ground in illuminating the differences between boys and girls how they perceive the world differently how they learn differently how they process emotions and take risks differently Dr Sax argued that in failing to recognize these hardwired differences between boys and girls we ended up reinforcing damaging stereotypes medicalizing normal behavior see the rising rates of ADHD diagnosis and failing to support kids to reach their full potential In the intervening decade the world has changed

drastically with an avalanche of new research which supports deepens and expands Dr Sax's work This revised and updated edition includes new findings about how boys and girls interact differently with social media and video games a completely new discussion of research on gender non conforming LGB and transgender kids new findings about how girls and boys see differently hear differently and even smell differently and new material about the medicalization of bad behavior

Line in the Tar Sands Joshua Kahn, Stephen D'Arcy, Tony Weis, Toban Black, 2014-10-15 Tar sands development comes with an enormous environmental and human cost In the tar sands of Alberta the oil industry is using vast quantities of water and natural gas to produce synthetic crude oil creating drastically high levels of greenhouse gas emissions and air and water

pollution But tar sands opponents fighting a powerful international industry are likened to terrorists government environmental scientists are muzzled and public hearings are concealed and rushed Yet despite the formidable political and economic power behind the tar sands many opponents are actively building international networks of resistance challenging pipeline plans while resisting threats to Indigenous sovereignty and democratic participation Including leading voices involved in the struggle against the tar sands A Line in the Tar Sands offers a critical analysis of the impact of the tar sands and the challenges opponents face in their efforts to organize effective resistance Contributors include Greg Albo S kihitowin Aw sis Toban Black Rae Breaux Jeremy Brecher Linda Capato Jesse Cardinal Angela V Carter Emily Coats Stephen D Arcy Yves Engler Cherri Foytlin Sonia Grant Harjap Grewal Randolph Haluza DeLay Ryan Katz Rosene Naomi Klein Melina Laboucan Massimo Winona LaDuke Crystal Lameman Christine Leclerc Kerry Lemon Matt Leonard Martin Lukacs Tyler McCreary Bill McKibben Yudith Nieto Joshua Kahn Russell Macdonald Stainsby Clayton Thomas Muller Brian Tokar Dave Vasey Harsha Walia Tony Weis Rex Weyler Will Wooten Jess Worth and Lilian Yap The editors proceeds from this book will be donated to frontline grassroots environmental justice groups and campaigns Global Value Chains Su Qingyi,2024-01-31 This book aims to help readers understand the status of the division of labour in global value chains its impact on traditional research topics and to familiarise readers with the application of input output methods in Global Value Chain GVC research The book features a combination of practices in China and offers international comparisons Chapters 1 to 4 discuss the measurement of global value chains specifically the measurement of the location of production the status of the division of labour and the risk of the GVC as well as the GVC and the Domestic Value Chain DVC Chapters 5 to 8 focus on the applications of GVCs in the study of traditional topics such as the structure of international trade the factor content of foreign trade the real effective exchange rate and environmental pollution This book will be a great read to students and scholars of statistics economics international trade and those interested in China s economy in general **Making Sense of Weather and Climate** Mark Denny,2017-01-17 How do meteorologists design forecasts for the next day s the next week s or the next month s weather Are some forecasts more likely to be accurate than others and why Making Sense of Weather and Climate takes readers through key topics in atmospheric physics and presents a cogent view of how weather relates to climate particularly climate change science It is the perfect book for amateur meteorologists and weather enthusiasts and for anyone whose livelihood depends on navigating the weather s twists and turns Making Sense of Weather and Climate begins by explaining the essential mechanics and characteristics of this fascinating science The noted physics author Mark Denny also defines the crucial differences between weather and climate and then develops from this basic knowledge a sophisticated yet clear portrait of their relation Throughout Denny elaborates on the role of weather forecasting in guiding politics and other aspects of human civilization He also follows forecasting s effect on the economy Denny s exploration of the science and history of a phenomenon we have long tried to master makes this book a unique companion for anyone who wants a complete

picture of the environment's individual societal and planetary impact **The Climate Planner** Jason King, 2021-08-25 The Climate Planner is about overcoming the objections to climate change mitigation and adaptation that urban planners face at a local level. It shows how to draft climate plans that encounter less resistance because they involve the public stakeholders and decisionmakers in a way that builds trust, creates consensus, and leads to implementation. Although focused on the local level, this book discusses climate basics such as carbon dioxide levels in the atmosphere, the Intergovernmental Panel on Climate Change, the Paris Agreement of 2015, worldwide energy generation forecasts, and other items of global concern in order to familiarize urban planners and citizen planners with key concepts that they will need to know in order to be able to host climate conversations at the local level. The many case studies from around the United States of America show how communities have encountered pushback and bridged the implementation gap, the gap between plan and reality, thanks to a commitment to substantive public engagement. The book is written for urban planners, local activists, journalists, elected or appointed representatives, and the average citizen worried about climate breakdown and interested in working to reshape the built environment.

Teaching Undergraduate Science Linda C. Hodges, 2023-07-03 This book is written for all science or engineering faculty who have ever found themselves baffled and frustrated by their undergraduate students' lack of engagement and learning. The author, an experienced scientist, faculty member, and educational consultant, addresses these issues with the knowledge of faculty interests, constraints, and day-to-day concerns in mind. Drawing from the research on learning, she offers faculty new ways to think about the struggles their science students face. She then provides a range of evidence-based teaching strategies that can make the time faculty spend in the classroom more productive and satisfying. Linda Hodges reviews the various learning problems endemic to teaching science, explains why they are so common and persistent, and presents a digest of key ideas and strategies to address them based on the research she has undertaken into the literature on the cognitive sciences and education. Recognizing that faculty have different views about teaching, different comfort levels with alternative teaching approaches, and are often pressed for time, Linda Hodges takes these constraints into account by first offering a framework for thinking purposefully about course design and teaching choices, and then providing a range of strategies to address very specific teaching barriers, whether it be students' motivation, engagement in class, ability to problem solve, their reading comprehension, or laboratory research or writing skills. Except for the first and last chapters, the other chapters in this book stand on their own; i.e., they can be read in any order and address a specific challenge students have in learning and doing science. Each chapter summarizes the research explaining why students struggle and concludes by offering several teaching options, categorized by how easy or difficult they are to implement. Some, for example, can work in a large lecture class without a great expenditure of time; others may require more preparation and a more adventurous approach to teaching. Each strategy is accompanied by a table categorizing its likely impact, how much time it will take in class or out, and how difficult it will be to implement. Like scientific research, teaching works best when faculty start with a

goal in mind plan an approach building on the literature use well tested methodologies and analyze results for future trials
Linda Hodges message is that with such intentional thought and a bit of effort faculty can succeed in helping many more students gain exciting new skills and abilities whether those students are potential scientists or physicians or entrepreneurs
Her book serves as a mini compendium of current research as well as a protocol manual a readily accessible guide to the literature the best practices known to date and a framework for thinking about teaching
