Climate Change and the Role of Education Walter Leal Filho, Sarah L. Hemstock, 2019-11-28 This book offers insights into the educational dimensions of climate change and promotes measures to improve education in this context. It is widely believed that education can play a key role in finding global solutions to many problems related to climate change. Indeed, education as a process not only helps young people to better understand and address the impact of global warming but also fosters better attitudes and behaviours to aid efforts towards mitigating climate change and adapting to a changing environment. But despite the central importance of education in relation to climate change, there is a paucity of publications on this theme. Against this background, the book focuses on the educational aspects of climate change and showcases examples of research projects and other initiatives aimed at educating various audiences. It also provides a platform for reflections on the role education can play in fostering awareness on a changing climate. Presenting a wide range of valuable lessons learned which can be adapted and replicated elsewhere, the book appeals to educators and practitioners alike.

The Practice of English as a Medium of Instruction (EMI) Around the World Carol Griffiths, 2023-08-08 This edited volume presents eleven empirical papers reporting the existing literature and the results of an original study focusing on EMI. English as a medium of instruction in a particular area: Central and Eastern Europe, Western and Southern Europe, Nordic, Baltic countries, Central Asia, the Middle East, East Asia, South East Asia, North Africa, Sub-Saharan Africa, South Asia, and Latin America. Each of these different areas tends to have its own ways of dealing with the EMI issue, and these are brought together in a meta-analysis in the final chapter. Implications for the conduct of English as a medium of instruction are drawn both on a chapter-by-chapter basis and also in the meta-analysis. The examination of EMI on a contextual basis is a unique feature of this book, setting it apart from others in the field which almost all deal with a single or limited context. The volume will be of interest to policymakers, institutional heads, graduate students, and their teachers, and to thesis writers and researchers.

Global Perspectives on Quality Assurance and Accreditation in Higher Education Institutions Magd, Hesham, Kunjumammed, Siraj Kariyilaparambu, 2021-09-17. Quality accreditation in higher education institutions (HEIs) is currently a buzzword. The need to maintain high quality education standards is a critical requirement for HEIs to remain competitive in the market, and for government and regulatory bodies to ensure the quality standards of programs offered. From being an implicit requirement that is internally addressed, quality assurance activities become an explicit requirement that is regularly audited and appraised by national and international accreditation agencies. HEIs are voluntarily integrating quality management systems (QMS) institutional and program specific in response to the political and competitive environment in which it exists. Through its higher education department or by creating non-profitable accreditation bodies, many governments have implemented a quality framework for licensing HEIs and invigilates its adherence based on which accreditation statuses are granted for HEIs.

Global Perspectives on Quality Assurance and Accreditation in Higher Education Institutions provides a comprehensive framework for HEIs to address quality assurance and quality accreditation requirements and serves as a practical tool to develop and deploy well-defined quality management systems in higher education. The book focuses on the critical aspects of quality assurance: the need to develop a concise and agile vision, mission, values, and graduate attributes; and to develop a system that effectively aligns the various activities of the HEI to the attainment of the strategic priorities listed in the institutional plans. The chapters each cover the various facets of the quality assurance framework and accreditation agencies requirements with practical examples of each. This book is useful for HEI administrators, quality assurance specialists in HEIs, heads of academic departments, internal auditors, external auditors, and other practitioners of quality along with stakeholders, researchers, academicians, and students interested in quality assurance and accreditation in higher education.
