Money Logging On The Trail Of The Asian Timber Mafia:

Money Logging Lukas Straumann, 2014 Money Logging investigates what Gordon Brown has called probably the biggest environmental crime of our times the massive destruction of the Borneo rainforest by Malaysian loggers Historian and campaigner Lukas Straumann goes in search not only of the lost forests and the people who used to call them home but also the network of criminals who have earned billions through illegal timber sales and corruption Straumann singles out Abdul Taib Mahmud current governor of the Malaysian state of Sarawak as the kingpin of this Asian timber mafia while he shows that Taib's family with the complicity of global financial institutions have profited to the tune of 15 billion US dollars Money Logging is a story of a people who have lost their ancient paradise to a wasteland of oil palm plantations pollution and corruption and how they hope to take it back Page 4 of cover

Dark Commerce Louise I. Shelley, 2018-11-13 A comprehensive look at the world of illicit trade Though mankind has traded tangible goods for millennia recent technology has changed the fundamentals of trade in both legitimate and illegal economies In the past three decades the most advanced forms of illicit trade have broken with all historical precedents and as Dark Commerce shows now operate as if on steroids tied to computers and social media In this new world of illicit commerce which benefits states and diverse participants trade is impersonal and anonymized and vast profits are made in short periods with limited accountability to sellers intermediaries and purchasers Louise Shelley examines how new technology communications and globalization fuel the exponential growth of dangerous forms of illegal trade the markets for narcotics and child pornography online the escalation of sex trafficking through web advertisements and the sale of endangered species for which revenues total in the hundreds of millions of dollars The illicit economy exacerbates many of the world's destabilizing phenomena the perpetuation of conflicts the proliferation of arms and weapons of mass destruction and environmental degradation and extinction Shelley explores illicit trade in tangible goods drugs human beings arms wildlife and timber fish antiquities and ubiquitous counterfeits and contrasts this with the damaging trade in cyberspace where intangible commodities cost consumers and organizations billions as they lose identities bank accounts access to computer data and intellectual property Demonstrating that illicit trade is a business the global community cannot afford to ignore and must work together to address Dark Commerce considers diverse ways of responding to this increasing challenge

God and Gaia Michael S Northcott, 2022-12-22 God and Gaia explores the overlap between traditional religious cosmologies and the scientific Gaia theory of James Lovelock It argues that a Gaian approach to the ecological crisis involves rebalancing human and more than human influences on Earth by reviving the ecological agency of local and indigenous human communities and of nonhuman beings Present day human ecological influences on Earth have been growing at pace since the Scientific and Industrial Revolutions when modern humans adopted a machine cosmology in which humans are the sole intelligent agency The resultant imbalance between human and Earthly agencies is degrading the species diversity of ecosystems causing local climate changes and threatens to destabilise the Earth as a System Across eight chapters this ambitious text engages with traditional cosmologies from the Indian Vedas and classical Greece to Medieval Christianity with case material from Southeast Asia Southern Africa and Great Britain It discusses concepts such as deep

time and ancestral time the ethics of genetic engineering of foods and viruses and holistic ecological management Northcott argues that an ontological turn that honours the differential agency of indigenous humans and other kind and that draws on sacred traditions will make it is possible to repair the destabilising impacts of contemporary human activities on the Earth System and its constituent ecosystems This book will be of considerable interest to students and scholars of the environmental humanities history and cultural and religious studies Global Political Economy John Ravenhill,2020 The most balanced blend of empirical material and analysis from leading scholars of Global Political Economy Written by leading international specialists Global Political Economy is a comprehensive yet accessible introduction to the field Skilfully interweaving history theory and topical issues and debates the authors offer an authoritative and stimulating guide which not only informs but also encourages readers to critically examine their own perspectives on the subject New to this edition Thoroughly updated to incorporate recent developments such as the Trump administration Brexit and populism Enhanced coverage of the political economy of the environment New material on globalization inequality and poverty Book jacket

Historical Dictionary of Malaysia Ooi Keat Gin,2017-12-18 Malaysia is one of the most intriguing countries in Asia in many respects It consists of several distinct areas not only geographically but ethnically as well along with Malays and related groups the country has a very large Indian and Chinese population The spoken languages obviously vary at home although Bahasa Malaysia is the official language and nearly everyone speaks English There is also a mixture of religions with Islam predominating among the Malays and others Hinduism and Sikhism among the Indians mainly Daoism and Confucianism among the Chinese but also some Christians as well as older indigenous beliefs in certain places This second edition of Historical Dictionary of Malaysia contains a chronology an introduction appendixes and an extensive bibliography The dictionary section has over 500 cross referenced entries on important personalities politics economy foreign relations religion and culture This book is an excellent resource for students researchers and anyone wanting to know more about Malaysia **Discourses, Agency and Identity in Malaysia** Zawawi Ibrahim,Gareth Richards,Victor T. King,2021-10-23

This book seeks to break new ground both empirically and conceptually in examining discourses of identity formation and the agency of critical social practices in Malaysia Taking an inclusive cultural studies perspective it questions the ideological narrative of race and ethnicity that dominates explanations of conflicts and cleavages in the Malaysian context The contributions are organised in three broad themes Identities in Contestation Borders Complexities and Hybridities takes a range of empirical studies literary translation religion gender ethnicity indigeneity and sexual orientation to break down preconceived notions of fixed identities This then opens up an examination of Identities and Movements Agency and Alternative Discourses in which contributors deal with counter hegemonic social movements of anti racism young people environmentalism and independent publishing that explicitly seek to open up greater critical democratic space within the Malaysian polity The third section Identities and Narratives Culture and the Media then provides a close textual reading of

some exemplars of new cultural and media practices found in oral testimonies popular music film radio programming and storytelling who have consciously created bodies of work that question the dominant national narrative This book is a valuable interdisciplinary work for advanced students and researchers interested in representations of identity and nationhood in Malaysia and for those with wider interests in the fields of critical cultural studies and discourse analysis Here is a fresh startling book to aid the task of unbinding the straitjackets of Malay Chinese and Indian with which colonialism bound Malaysia's plural inheritance and on which the postcolonial state continues to rely In it a panoply of unlikely identities Bajau liminality Kelabit philosophy Islamic feminism refugee hybridity and more finds expression and offers hope for liberation Rachel Leow University of Cambridge This book shakes the foundations of race thinking in Malaysian studies by expanding the range of cases perspectives and outcomes of identity It offers students of Malaysia an examination of identity and agency that is expansive critical and engaging and its interdisciplinary depth brings Malaysian studies into conversation with scholarship across the world Sumit Mandal University of Nottingham Malaysia This is a much needed work that helps us to take apart the colonial inherited categories of race which informed the notion of the plural society the idea of plurality without multiculturalism It complicates the picture of identity by bringing in religion gender indigeneity and sexual orientation and helps us to imagine what a truly multiculturalist Malaysia might look like Syed Farid Alatas National University of Singapore

The Wasting of Borneo Alex Shoumatoff, 2017-04-11 Acclaimed naturalist Alex Shoumatoff issues a worldwide call to protect the drastically endangered rainforests of Borneo In his eleventh book but his first in almost two decades seasoned travel writer Alex Shoumatoff takes readers on a journey from the woods of rural New York to the rain forests of the Amazon and Borneo documenting both the abundance of life and the threats to these vanishing Edens in a wide ranging narrative Alex and his best friend Davie spent their formative years in the forest of Bedford New York As adults they grew apart but bonded by the imaginary jungle of their childhood Alex and Davie reunited fifty years later for a trip to a real jungle in the heart of Borneo During the intervening years Alex had become an author and literary journalist traveling the world to bring to light places animals and indigenous cultures in peril The two reconnect and spend

three weeks together on Borneo one of the most imperiled ecosystems on earth Insatiable demand for the palm oil ubiquitous in consumer goods is wiping out the world's most ancient and species rich rain forest home to the orangutan and countless other life forms including the Penan people with whom Alex and Davie camp The Penan have been living in Borneo's rain forest for millennia but 90 percent of the lowland rain forest has already been logged and burned to make way for vast oil palm plantations Among the most endangered tribal people on earth the Penan are fighting for their right to exist Shoumatoff condenses a lifetime of learning about what binds humans to animals nature and each other culminating in a celebration of the Penan and a call for Westerners to address the palm oil crisis and protect the biodiversity that sustains us all

Environmentalism of the Rich Peter Dauvergne, 2018-02-09 What it means for global sustainability when environmentalism is dominated by the concerns of the affluent eco business eco consumption wilderness preservation Over the last fifty years environmentalism has emerged as a clear counterforce to the environmental destruction caused by industrialization colonialism and globalization Activists and policymakers have fought hard to make the earth a better place to live But has the environmental movement actually brought about meaningful progress toward global sustainability Signs of global unsustainability are everywhere from decreasing biodiversity to scarcity of fresh water to steadily rising greenhouse gas emissions Meanwhile as Peter Dauvergne points out in this provocative book the environmental movement is increasingly dominated by the environmentalism of the rich diverted into eco business eco consumption wilderness preservation energy efficiency and recycling While it's good that for example Barbie dolls packaging no longer depletes Indonesian rainforest and that Toyota Highlanders are available as hybrids none of this gets at the source of the current sustainability crisis More eco products can just mean more corporate profits consumption and waste Dauvergne examines extraction booms that leave developing countries poor and environmentally devastated with the ruination of the South Pacific island of Nauru a case in point the struggles against consumption inequities of courageous activists like Bruno Manser who worked with indigenous people to try to save the rainforests of Borneo and the manufacturing of vast markets for nondurable goods for example convincing parents in China that disposable diapers made for healthier and smarter babies Dauvergne reveals why a global political economy of ever more more growth more sales more consumption is swamping environmental gains

Environmentalism of the rich does little to bring about the sweeping institutional change necessary to make progress toward global sustainability **The Tropical Oil Crop Revolution** Derek Byerlee, Walter P. Falcon, Rosamond Naylor, 2017 The book provides a broad synthesis of the major supply and demand drivers of the dramatic expansion of oil crops in the tropics its economic social and environmental impacts and the future outlook to 2050 It is a comprehensive review of the oil crop sector with a major focus on oil palm and soybeans the two most dynamic crops in world agriculture in recent decades
