A Guide to Spatial History Konrad Lawson, Riccardo Bavaj, Bernhard Struck, 2022-01-07 This guide provides an overview of the thematic areas analytical aspects and avenues of research which together form a broader conversation around doing spatial history Spatial history is not a field with clearly delineated boundaries For the most part it lacks a distinct unambiguous scholarly identity It can only be thought of in relation to other typically more established fields Indeed one of the most valuable utilities of spatial history is its capacity to facilitate conversations across those fields Consequently it must be discussed in relation to a variety of historiographical contexts Each of these have their own intellectual genealogies institutional settings and conceptual path dependencies With this in mind this guide surveys the following areas territoriality infrastructure and borders nature environment and landscape city and home social space and political protest spaces of knowledge spatial imaginaries cartographic representations and historical GIS research

The Mapping of a Russian War: The Atlas of the Principality of Polatsk by Stanisław Pacholowiecki (1580) Jakub Niedźwiedź, Karol Łopatecki, Grzegorz

Franczak, 2024-12-02 This volume is a comprehensive analysis of the Atlas of the Principality of Polatsk 1580 one of the

oldest cartographic representations of the military conflict between Russia Muscovy and the Western world Its author the Polish royal cartographer Stanis aw Pachowicki drew the maps at the beginning of the Livonian War 1579 1582 when the Polish Lithuanian army liberated the Lithuanian and Livonian lands from Muscovian occupation The Mapping of a Russian War focuses on the military aspects of the maps their political and propaganda use and the Early Modern construction of the past through maps The authors present an innovative approach to these maps rarely examined by the international research community

Maphead Ken Jennings, 2012-04-17 This book traces the history of mapmaking while offering insight into the role of cartography in human civilization and sharing anecdotes about the cultural arenas frequented by map enthusiasts It comes as no surprise that as a kid Jeopardy legend Ken Jennings slept with a bulky Hammond world atlas by his pillow every night It recounts his lifelong love affair with geography and explores why maps have always been so fascinating to him and to fellow enthusiasts everywhere He takes readers on a world tour of geogeeks from the London Map Fair to the computer programmers at Google Earth Each chapter delves into a different aspect of map culture highpointing geocaching road atlas rallying even the unreal estate charted on the maps of fiction and fantasy He also considers the ways in which cartography has shaped our history suggesting that the impulse to make and read maps is as relevant today as it has ever been

Defending Illusions Allan K. Fitzsimmons, 1999 Fitzsimmons examines the science philosophy and law of ecosystems management and shows how efforts to make federal protection of ecosystems the centerpiece of national environmental policy are driven by religious veneration of Mother Earth wrapped in a veil of weak science

Masons, Tricksters and Cartographers David Turnbull, 2003-09-02 In an eclectic and highly original study Turnbull brings together traditions as diverse as cathedral building Micronesian navigation cartography and turbulence research He argues that all our differing ways of producing knowledge including science are messy spatial and local Every culture has its own ways of assembling local knowledge thereby creating space through the linking of people practices and places The spaces we inhabit and assemblages we work with are not as homogenous and coherent as our modernist perspectives have led us to believe rather they are complex and heterogeneous motleys

Springer Handbook of Geographic Information Wolfgang Kresse, David M. Danko, 2012-02-21 Computer science provides a powerful tool that was virtually unknown three generations ago Some of the classical fields of knowledge are geodesy surveying cartography and geography Electronics have revolutionized geodetic methods Cartography has faced the dominance of the computer that results in simplified cartographic products All three fields make use of basic components such as the Internet and databases The Springer Handbook of Geographic Information is organized in three parts Basics Geographic Information and Applications Some parts of the basics belong to the larger field of computer science However the reader gets a comprehensive view on geographic information because the topics selected from computer science have a close relation to geographic information The Springer Handbook of Geographic Information is written for scientists at universities and industry as well as advanced and PhD students

reading throughout Europe There is no better place to witness this rise of popular cartography than in Alsace Lorraine a disputed borderland that the French and Germans both claimed as their national territory Desired for its prime geographical position and abundant natural resources Alsace Lorraine endured devastating wars from 1870 to 1945 that altered its borders four times transforming its physical landscape and the political allegiances of its citizens For the border population whose lives were turned upside down by the French German conflict maps became essential tools for finding a new sense of place and a new sense of identity in their changing national and regional communities Turning to a previously undiscovered archive of popular maps Cartophilia reveals Alsace Lorraine s lively world of citizen mapmakers that included linguists ethnographers schoolteachers hikers and priests Together this fresh group of mapmakers invented new genres of maps that framed French and German territory in original ways through experimental surveying techniques orientations scales colors and iconography In focusing on the power of bottom up maps to transform modern European identities Cartophilia argues that the history of cartography must expand beyond the study of elite maps and shift its emphasis to the democratization of cartography in the modern world

The Imperial Map James R. Akerman, 2009-03 Maps from virtually every culture and period convey our tendency to see our communities as the centre of the world if not the universe and by implication as superior to anything beyond our boundaries This study examines how cartography has been used to prop up a variety of imperialist enterprises

All Mapped Out Mike Duggan, 2024-05-06 From cave paintings to Google a thought provoking investigation of how maps do not just reflect the world around us but shape the way we live Maps go far beyond just showing us where things are located All Mapped Out is an exploration of how maps impact our lives on social and cultural levels This book offers a journey through the fascinating history of maps from ancient cave paintings and stone carvings to the digital interfaces we rely on today But it s not just about the maps themselves it s about the people behind them All Mapped Out reveals how maps have affected societies influenced politics and economies impacted the environment and even shaped our sense of personal identity Mike Duggan uncovers the incredible power of maps to shape the world and the knowledge we consume offering a unique and eye opening perspective on the significance of maps in our daily lives

How New York Became American, 1890-1924 Art M. Blake, 2020-04-14 Originally published in 2006 For many Americans at the turn of the twentieth century and into the 1920s the city of New York conjured dark images of crime poverty and the desperation of crowded immigrants In How New York Became American 1890 1924 Art M Blake explores how advertising professionals and savvy business leaders reinvented the city creating a brand image of New York that capitalized on the trend toward pleasure travel Blake examines the ways in which these early boosters built on the attention drawn to the city and its exotic populations to craft an image of New York City as America writ urban a place where the arts flourished diverse peoples lived together boisterously but peacefully and where one could enjoy a visit Drawing on a wide range of textual and visual primary sources Blake guides the reader through New York s many civic identities from the first generation of New York skyscrapers

and their role in Americanizing the city to the promotion of Midtown as the city's definitive public face. His study ranges from the late 1890s into the early twentieth century when the United States suddenly emerged as an imperial power and the nation's industry, commerce, and culture stood poised to challenge Europe's global dominance. New York, the nation's largest city, became the de facto capital of American culture. Social reformers and tourism boosters keen to see America's cities rival those of France or Britain jockeyed for financial and popular support. Blake weaves a compelling story of a city's struggle for metropolitan and national status and its place in the national imagination.
