Ford first started manufacturing Model Ts more than 100 years ago he didn't really have any sort of pickup or truck configuration in mind. However enterprising people and businesses were modifying those early chassis for commercial use and it didn't take long for Ford to figure out that there was a demand for a truck application of the Model T. Soon Ford was making its own configurations for commercial use first through third party body companies and eventually by Ford itself with the Model TT. From these humble beginnings Ford stumbled onto the basis for one of the most popular vehicles ever built the Ford F Series pickup truck. In *Ford F Series Trucks 1948 Present* authors Jimmy Dinsmore and James Halderman thoroughly dissect the history of Ford F Series pickup trucks as seen from a technical viewpoint. Fully covered are all the options chassis specifications running changes and the evolution of these trucks as they transformed from postwar utilitarian vehicles to the best selling luxury family cruisers seen today. Not only are Ford trucks the best selling trucks they are the best selling vehicle of any category cars included. This book will thrill truck aficionados and Ford historians alike as it covers the first F Series models 1948 1952 the ever popular second generation F Series models 1953 1956 the popular Bumpsides 1967 1972 and all the way through the remarkable technology of what is now the 14th generation of the F Series.

This highly accessible and innovative text with supporting web site uses Excel R to teach the core concepts of econometrics without advanced mathematics. It enables students to use Monte Carlo simulations in order to understand the data generating process and sampling distribution. Intelligent repetition of concrete examples effectively conveys the properties of the ordinary least squares OLS estimator and the nature of heteroskedasticity and autocorrelation. Coverage includes omitted variables binary response models basic time series and simultaneous equations. The authors teach students how to construct their own real world data sets drawn from the internet which they can analyze with Excel R or with other econometric software.
