## **Moonshots In Education Launching Blended Learning In The Classroom:**

Moonshots in Education Esther Wojcicki, Lance Izumi, Alicia Chang, 2014-12-01 Moonshots in Education explores digital and online learning in the classroom and what it takes to make a moonshot. It gives several models and examples of schools that are already implementing digital learning and what the success rate has been. It also provides philosophical discussion, a variety of educational philosophies, and how each one empowers students and teachers. The book also provides tools to support teachers in most subject areas. The forward by James Franco explores how this type of blended real world learning has made a significant positive impact in his life.

**The Fuzzy and the Techie** Scott Hartley, 2017-04-25 Artfully explains why it is time for us to get over the false division between the human and the technical. Tim Brown, CEO of IDEO and author of *Change by Design*. Scott Hartley first heard the terms fuzzy and techie while studying political science at Stanford University. If you majored in humanities or social sciences you were a fuzzy. If you majored in computer or hard sciences you were a techie. While Silicon Valley is generally considered a techie stronghold, the founders of companies like Airbnb, Pinterest, Slack, LinkedIn, PayPal, Stitch Fix, Reddit, and others are all fuzzies. In other words, people with backgrounds in the liberal arts. In this brilliantly counterintuitive book, Hartley shatters assumptions about business and education today. Learning to code is not enough. The soft skills: curiosity, communication, and collaboration, along with an understanding of psychology and society's gravest problems, are central to why technology has value. Fuzzies are the instrumental stewards of robots, artificial intelligence, and machine learning. They offer a human touch that is of equal if not greater importance in our technology-led world than what most techies can provide. For anyone doubting whether a well-rounded liberal arts education is practical in today's world, Hartley's work will come as an inspiring revelation. Finalist for the 2016 Financial Times McKinsey Bracken Bower Prize and A Financial Times Business Book of the Month.

**An Educator's Guide to Dual Language Instruction** Gayle Westerberg, Leslie Davison, 2016-04-14 This user-friendly book is a key resource for teachers and administrators to ensure their school's success in implementing and maintaining a dual language program. Authors Gayle Westerberg and Leslie Davison share their own experiences leading a dual language school, the obstacles they overcame, and the best practices they learned along the way. The book is filled with step-by-step instructions and strategies you can try immediately, as well as inspirational stories from educators in urban and rural dual language programs across the country. Topics include: Choosing a model for your dual language program and involving all stakeholders in the transition process; Marketing your program effectively to recruit students and staff, including international teachers; Implementing a standards-based instructional framework focused on direct vocabulary instruction, extensive reading, and using language in context; Setting proficiency targets and using internal and external assessments to track students' progress; Incorporating technology for a more interactive and engaging language learning experience. You'll also learn how to effectively transition your program through different grade levels and build a collaborative school culture for a strong, long-lasting K-12 dual language program.
