

Morgan's Great Raid

This is the route Confederate Brig Gen. John Hunt Morgan followed on his "Great Raid" 140 years ago. Though Morgan dallied in Tennessee for most of June to prepare for the ride north, the raid officially began on July 2, 1863, when Morgan crossed into Kentucky, and it ended on July 26, 1863, when Morgan was captured near West Point, Ohio, about 60 miles northwest of Pittsburgh. Morgan's men at the point of their surrender made it further north than any Confederate troops during the Civil War.

Lynne,2020-11-13 This book presents

the Metaeconomics Framework and Dual Interest Theory which weave the empathy based moral and ethical dimension back into key economic questions Metaeconomics addresses the problem of placing too much emphasis on the market or the government and thus argues that seeing the link between ego and empathy self and other interest and market and government will lead to a more just fair and sustainable polity The unique Dual Interest Theory proposes that ego based self interest and empathy based other interest are joint and internal to each person it maintains the original proposition from Adam Smith that each person maximizes their own interest which Metaeconomics makes clear involves balancing the two joint interests although self interest is more primal The book begins with an explanation of how Metaeconomics connects the other kinds of economics The book then provides a series of applications of Metaeconomics in heated policy issues such as elections finance family food health natural resources education taxes and extreme inequality among others Finally the book concludes that the only way to save capitalism is to bring empathy into both private and public actions and bring about a more humane balance in market and government **R.U.S.** ,1925 *Kentucky Off the Beaten Path*® Zoe Strecker,Jackie
