The units begin with a set of case studies written for early childhood, elementary, middle, and secondary classrooms, providing students with direct insight into the dynamics influencing the future students they plan to teach. All 25 modules highlight diversity, emphasizing how psychological factors adapt and change based on external influences such as sex, gender, race, language, disability status, and socioeconomic background. The Fourth Edition includes over three hundred new references across all 25 modules and expanded coverage of diversity in new diversity related research.
