Horticultural Plant Breeding Thomas J. Orton, 2019-11-21 Horticultural Plant Breeding is a complete and comprehensive resource for the development of new cultivars or clones of horticultural crops. It covers the basic theories that underpin plant breeding and applies Mendelian quantitative and population inheritance practices in smaller populations where the individual plant has high value. Specific traditional breeding methods are also covered with an emphasis on how these methods are adapted for horticultural species. In addition, the integration of biotechnologies with traditional breeding methodologies is explored with an emphasis on specific applications for fruits, vegetables, and ornamental crop species. Presented in focused sections, Horticultural Plant Breeding addresses historical perspectives and context and genetics as a critical foundation of plant breeding. It highlights treatments of the various components of breeding programs such as breeding objectives, germplasm population engineering, mating systems, enhanced selection methods, established breeding methods applicable to inbreeding and outcrossing situations, and post-breeding activities. Provides a complete and comprehensive resource for those involved in the development of new cultivars or clones of horticultural crops. Guides readers to the most appropriate breeding strategy including potential integration of traditional and biotechnology strategies that will best achieve a cost-effective outcome. Will include access to 20 narrated slide sets to facilitate additional understanding.

Dimensions of Personality Martin Rein, Hans Eysenck, 2018-02-06 This is the original work on which Hans Eysenck's fifty years of research have been built. It introduced many new ideas about the nature and measurement of personality into the field, related personality to abnormal psychology, and demonstrated the possibility of testing personality theory experimentally. The book is the result of a concentrated and cooperative effort to discover the main dimensions of personality and to define them operationally, that is, by means of strictly experimental quantitative procedures. More than three dozen separate researches were carried out on some 10,000 normal and neurotic subjects by a research team of psychologists and psychiatrists. A special feature of this work is the close collaboration between psychologists and psychiatrists. Eysenck believes that the exploration of personality would have reached an advanced state much earlier had such a collaboration been the rule rather than the exception in studies of this kind. Both disciplines benefit by working together on the many problems they have in common. In his new introduction, Eysenck discusses the difficulty he had in conveying this belief to scientists from opposite ends of the psychology spectrum when he first began work on this book. He goes on to explain the basis from which Dimensions of Personality developed. Central to any

concept of personality he states must be hierarchies of traits organized into a dimensional system The two major dimensions he posited neuroticism and extraversion were in disfavor with most scientists of personality at the time Now they form part of practically all descriptions of personality Dimensions of Personality is a landmark study and should be read by both students and professionals in the fields of psychiatry psychology and sociology *Oxford Desk Reference: Clinical Genetics and Genomics* Helen V. Firth, Jane A. Hurst, 2017 The new edition of this classic text provides a practical easy to use guide to clinical consultation in genetics covering the process of diagnosis investigation management and counselling for patients All genetic conditions are covered as well as referral categories for a clinical genetic opinion *Textbook of Pemphigus and Other Autoimmune Bullous Diseases* Sujay Khandpur, Raghavendra Rao, Atiya Yaseen, Saritha Mohanan, 2024-02-21

Sacred Founders Diliانا N. Angelova, 2015-09-02 Diliانا Angelova argues that from the time of Augustus through early Byzantium a discourse of sacred founders articulated in artwork literature imperial honors and the built environment helped legitimize the authority of the emperor and his family The discourse coalesced around the central idea bound to a myth of origins that imperial men and women were sacred founders of the land mirror images of the empire's divine founders When Constantine and his formidable mother Helena established a new capital for the Roman Empire they initiated the Christian transformation of this discourse by brilliantly reformulating the founding myth Over time this transformation empowered imperial women strengthened the cult of the Virgin Mary fueled contests between church and state and provoked an arresting synthesis of imperial and Christian art Sacred Founders presents a bold interpretive framework that unearths deep continuities between the ancient and medieval worlds recovers a forgotten transformation in female imperial power and offers a striking reinterpretation of early Christian art *War Lives* Nitza Ben-Dov, 2024-11-15 Since the nation's founding Israel has existed in a state of near perpetual warfare Despite this Hebrew novels that deal with the experience of contemporary conflict are surprisingly rare In War Lives Nitza Ben-Dov argues that Israeli writers employ the freedoms granted by fiction to challenge the heroic myth of war She suggests that these writers do so not only by turning inwards towards the home front and the psyches of individuals marked by post trauma but also by unsettling the relationship between historical fact and fiction between purported reliability and representation Through close readings of a range of novels by authors such as S Y Agnon Yehuda Amichai and Amos Oz Ben-Dov foregrounds war as a coordinate from which Israeli novels are driven and to which they return in equal measure While each chapter focuses on a different theme from mourning to battleground camaraderie to vengeance Ben-Dov's literary analyses demonstrate how these canonical works afford an in depth view of the symbiosis between civilian and military life the comorbidity of life living under the constant threat of war

monumental secular buildings public porticoes small public baths shops workshops and non elite houses The finishing of these structures has been overlooked at the expense of more lofty buildings and remains one of the least known aspects of the late antique city The author surveys the archaeological evidence for decoration in the region with the maritime sites of Ostia and Ephesus selected as case studies Drawing upon archaeological written and visual sources it attempts to reconstruct how such buildings appeared to late antique viewers and investigates why they were decorated as they were
