Questions 3 - 5 refer to the following survey:

You want to know something about your neighbors, so you give them a survey. The survey collects the following data about each family on your block: family size, the kind of pets they have, the grade of the youngest child in the family, the family's average annual income over the last five years, what the dad does for a living, whether the mom works, and their phone number. Each kind of data you collect about a family is a variable.

3. Which of the variables you collect are continuous data?
 - A. Average annual income and phone number
 - B. Only family size
 - C. Grade of youngest child and average annual income
 - D. Only average annual income
 - E. Average annual income and family size
4. What are the categorical variables in your survey?
 - A. Family size, dad's occupation, whether mom works, and kind of pets
 - B. Dad's occupation, whether mom works, and kind of pets
 - C. Grade of youngest child, dad's occupation, whether mom works, and kind of pets
 - D. Everything but average annual income and family size
 - E. Everything but average annual income
5. True or False: In the survey of your neighbors described above, the only discrete quantitative data you're collecting about your neighbors is family size.
6. Which of the following would most likely be graphed as a bar chart rather than a histogram?
 - A. The number of blue, red, black, and white cars in a random sample of 500 cars
 - B. The number of students in a mid-size university who own Macintosh or PC computers
 - C. The ethnic distribution for a major city
 - D. The number of people in various management positions at a large electronics store
 - E. All of the above
