Financial Management,2007 **Banking in the Age of the Platform Economy** Giorgio Bou-Daher,2023-05-22 The 2008 global financial crisis and the concurrent rise of the platform economy have had profound effects on the banking sector Over the past decade and a half banking leaders have had to contend with rapidly evolving regulatory technological and competitive forces The pace of technological change has been formidable with advances in artificial intelligence cloud computing and blockchain technology These forces have brought to the forefront new managerial imperatives that banking leaders have to make sense of as they strategise in light of these unfolding new realities Banking in the Age of the Platform Economy explores the strategies that managers and leaders at banks and other financial institutions have adopted in response to the rise of the platform economy the new forces of interdependence that it entails and the risks opportunities involved in cocreating value with external stakeholders With its discussion of the strategies of interdependence and value cocreation that the top twenty banks in Europe adopted between 2008 and 2019 this book is essential reading for academics banking and fintech professionals and management consultants that advise banks and fintechs **Forest Service**

Performance and Accountability Report United States. Forest Service,2004 **The Governance of Energy Megaprojects** Benjamin K. Sovacool,C. J. Cooper,2013-07-01 Benjamin Sovacool and Christopher Jon Cooper have produced an astonishing and well written book based on extensive original research in twelve countries They explore the technical social political and economic dimensions of four energy megaprojects The large scale of megaprojects always appears to complicate the decision making process and often causes failures Megaprojects may even reinforce corruption and erode democracy It highlights that today s experiences can be explained by statements by Aristotle and Einstein who argue both in their own way that is always wise to take the limits of size into account and to reduce the size of projects wherever this is possible For everybody involved in megaprojects this book must be read Hugo Priemus Delft University of Technology The Netherlands Based on extensive original research this book explores the technical social political and economic dimensions of four Asian energy megaprojects a regional natural gas pipeline network in Southeast Asia a series of hydroelectric dams on the island of Borneo an oil pipeline linking Europe with the Caspian Sea and a very large solar energy array in the Gobi desert This book investigates why energy megaprojects fail to deliver their promised benefits It offers the first comprehensive assessment of the complicated dynamics driving and constraining megaprojects initiated in the rapid

scramble for energy resources and efforts to improve energy security The authors approach the assessment of megaprojects from a socio technical angle emphasizing broad issues of political leadership regulation financing interest group opposition and environmental impact as well as conventional technological factors such as engineering design and project management The Governance of Energy Megaprojects will prove insightful for academics concerned about energy policy energy security environmental impact and technology assessment But the book should prove equally compelling to those engaged in the practical management and implementation of large scale energy projects anywhere in the world **VUCA and Other**
