Homework: Please write your answers on separate paper.

Letters 1-4

1. Who is writing Letter 1 (and all the letters)?

Robert Walton

2. To whom is he writing? What is their relationship?

Mrs. Saville, his sister

3. Where is Robert Walton when he writes Letter 1? Why is he there? What are his plans?

St. Petersburg, Russia. He is hiring a crew for his ship. He intends to sail to the North Pole and discover magnetism.

4. What does Robert Walton tell us about himself?

He is passionately committed to discovery and adventure. He wishes he had a friend with the same sensibilities and he says he is self-taught.

5. Where is Walton now? What do you think of Walton's question "What can stop the determined heart and resolved will of man"?

Walton is out to sea, sailing north. The quotation establishes the Romantic idea of the power of emotion over reason.

6. How much time has elapsed between Letter 3 and Letter 4? What "strange accident" has happened to the sailors?

One month has lapsed. The accident is the ship is trapped in ice and fog.

7. Why does the man picked up by the ship say he is there? What shape is he in?

The man says he is "seek[ing] one who fled from me" (11) and he asks which direction the ship is sailing. He is near death, weak and emaciated.

8. What sort of person does he seem to be? How does Walton respond to this man?

The man remains silent and this creates a sense of mystery around him. Walton finds the man eloquent, educated and refined.

Fiction Cinema, 2d ed. Mark C. Glassy, 2024-12-24 Science fiction cinema has dramatically affected the perception of science by the general population. If science fiction and actual science sometimes seem at odds, they importantly share the elements of curiosity, creativity, and imagination, and there are many examples of yesterday's science fiction becoming today's science. This book explores the imaginative elements of biology seen in 20th-century science fiction films. Written by a professional scientist and science fiction lover, this second edition includes recent updates of biomedical science and science fiction cinema. It covers different categories of biology: biochemistry or molecular biology and medicine, each subcategorized into chapters such as cell biology, hematology, and dermatology. Within each chapter are several film examples explaining the biological sciences principles involved, what is right and what is wrong with the science, and what changes could be made for the science of the film to become a reality.
