INTRODUCTION

What is a research paper?

"Research paper." What image comes into mind as you hear those words: working with stacks of articles and books, hunting the "treasure" of others' thoughts? Whatever image you create, it's a sure bet that you're envisioning sources of information--articles, books, people, and artworks. Yet a research paper is more than the sum of your sources, more than a collection of different pieces of information about a topic, and more than a review of the literature in a field.

A research paper is piece of academic writing based on its author's original research work on a particular topic and the analysis and interpretation of research findings.

In other words, a research paper is an expanded essay that presents your own interpretation or evaluation or argument. When you write an essay, you use everything that you personally know and have thought about a subject. When you write a research paper you build upon what you know about the subject and make a deliberate attempt to find out what experts know. A research paper involves surveying a field of knowledge in order to find the best possible information in that field. And that survey can be orderly and focused, if you know how to approach it. Don't worry--you won't get lost in a sea of sources.

To achieve supreme excellence in anything we do, we need more than just the knowledge. Like a cricket player aiming for world cup, we must have a positive attitude and believe that we have the ability to achieve it. That will be the real start for writing A⁺ research paper.
