Relative Clauses in Languages of the Americas Bernard Comrie,Zarina Estrada Fernández,2012 Patterns of relative
clause formation tend to vary according to the typological properties of a language Highly polysynthetic languages tend to
have fully nominalized relative clauses and no relative pronouns while other typologically diverse languages tend to have
relative clauses which are similar to main or independent clauses Languages of the Americas with their rich genetic diversity
have all been under the influence of European languages whether Spanish English or Portuguese a situation that may be
expected to have influenced their grammatical patterns The present volume focuses on two tasks The first deals with the

discussion of functional principles related to relative clause formation diachrony and paths of grammaticalization simplicity vs complexity and formalization of rules to capture semantic syntactic correlations The second provides a typological overview of relative clauses in nine different languages going from north to south in the Americas **(Free Sample)**
