Jeffrey M. Perl, 2007 In the last homily he gave before becoming Pope Benedict XVI Cardinal Joseph Ratzinger described modern life as ruled by a dictatorship of relativism which does not recognize anything as definitive and whose ultimate goal consists solely of satisfying the desires of one's own ego An eminent scholar familiar with the centuries old debates over relativism Ratzinger chose to oversimplify or even caricature a philosophical approach of great sophistication and antiquity His homily depicts the relativist as someone blown about by every wind of doctrine whereas the relativist sticks firmly to one argument that human

knowledge is not absolute Gathering prominent intellectuals from disciplines most relevant to the controversy ethics theology political theory anthropology psychology cultural studies epistemology philosophy of science and classics this special double issue of Common Knowledge contests Ratzinger's denunciation of relativism One essay relates the arguments of Ratzinger to those of two other German scholars the conservative political theorist Ernst Wolfgang Bockenforde and the liberal philosopher and sociologist Jürgen Habermas since all three men assume that social order depends on the existence of doctrinal authority divine or otherwise The contributors here argue for an intellectual and social life free of the desire for an infantilizing authority One proposes that the Christian god is a relativist who prefers limitation and ambiguity another initially in agreement with Ratzinger about the danger relativism poses to faith and morals then argues that this danger is what makes relativism valuable The issue closes with the first English translation of an extract from a book on Catholic Jewish relations by Cardinal Carlo Maria Martini one of the Catholic Church's most progressive figures Contributors David Bloor Daniel Boyarin Mary Baine Campbell Lorraine Daston Arnold I Davidson John Forrester Kenneth J Gergen Simon Goldhill Jeffrey F Hamburger Julia Kristeva Carlo Maria Cardinal Martini Christopher Norris Joseph Cardinal Ratzinger Richard Shusterman Barbara Herrnstein Smith Jeffrey Stout Gianni Vattimo

Imagined Causes: Hume's Conception of Objects Stefanie Rocknak, 2012-09-14 This book provides the first comprehensive account of Hume's conception of objects in Book I of A Treatise of Human Nature What according to Hume are objects Ideas Impressions Mind independent objects All three None of the above Through a close textual analysis Rocknak shows that Hume thought that objects are imagined ideas But she argues he struggled with two accounts of how and when we imagine such ideas On the one hand Hume believed that we always and universally imagine that objects are the causes of our perceptions On the other hand he thought that we only imagine such causes when we reach a philosophical level of thought This tension manifests itself in Hume's account of personal identity a tension that Rocknak argues Hume acknowledges in the Appendix to the Treatise As a result of Rocknak's detailed account of Hume's conception of objects we are forced to accommodate new interpretations of at least Hume's notions of belief personal identity justification and causality

Recollections of a Jewish Mathematician in Germany Abraham A. Fraenkel,2016-10-21 Abraham A Fraenkel was a world renowned mathematician in pre Second World War Germany whose work on set theory was fundamental to the development of modern mathematics A friend of Albert Einstein he knew many of

the era's acclaimed mathematicians personally. He moved to Israel then Palestine under the British Mandate in the early 1930s. In his autobiography Fraenkel describes his early years growing up as an Orthodox Jew in Germany and his development as a mathematician at the beginning of the twentieth century. This memoir originally written in German in the 1960s has now been translated into English with an additional chapter covering the period from 1933 until his death in 1965 written by the editor Jiska Cohen Mansfield. Fraenkel describes the world of mathematics in Germany in the first half of the twentieth century: its origins and development, the systems influencing it, and its demise. He also paints a unique picture of the complex struggles within the world of Orthodox Jewry in Germany. In his personal life, Fraenkel merged these two worlds during periods of turmoil including the two world wars and the establishment of the state of Israel. Including a new foreword by Menachem Magidor. Foreword to the 1967 German edition by Yehoshua Bar Hillel. **The Philosophical Review** Jacob Gould Schurman, James Edwin Creighton, Frank Thilly, Gustavus Watts Cunningham, 1909.
