Holmes Heaters Manual:

A Manual for Neanderthals H. Mewhinney, 2014-07-03 The story of humanity's earliest days on earth has come down to us chiefly in the tools and weapons early hominids shaped from flint. With these tools they gained ascendancy over less dexterous beasts and began the slow conquest of their environment. Other records including their very bones have largely rotted away but their tools of flint endure. H. Mewhinney presents *A Manual for Neanderthals* as a common sense down to earth study of how flint tools and weapons were made or for that matter can still be made by any descendant of Stone Age man. The author first sets the scene with a delightful and informative disquisition on flintflaking and flint flakers and then explains clearly and concisely how he and earlier Neanderthals have made flint artifacts illustrating each step with drawings and photographs. Archeologists and anthropologists will discover in this book a modest but genuine contribution to their fields while collectors of Indian relics and people who like to tinker with tools and master unusual skills will find it a surprisingly practical guide to an interesting and ancient art. With patience and with *A Manual for Neanderthals* at your side you too can learn to flake flint. *Handbook of English Antiquities for the Collector and the Student* George Clinch, 1905
