How to Grow a Robot Mark H. Lee, 2020-05-26 How to develop robots that will be more like humans and less like computers more social than machine like and more playful and less programmed Most robots are not very friendly They vacuum the rug mow the lawn dispose of bombs even perform surgery but they aren t good conversationalists It s difficult to make eye contact If the future promises more human robot collaboration in both work and play wouldn t it be better if the robots were less mechanical and more social In How to Grow a Robot Mark Lee explores how robots can be more human like friendly and engaging Developments in artificial intelligence notably Deep Learning are widely seen as the foundation on which our robot future will be built These advances have already brought us self driving cars and chess match winning algorithms But Lee writes we need robots that are perceptive animated and responsive more like humans and less like computers more social than machine like and more playful and less programmed The way to achieve this he argues is to grow a robot so that it learns from experience just as infants do After describing what s wrong with artificial intelligence one key shortcoming it s not embodied Lee presents a different approach to building human like robots developmental robotics inspired by developmental psychology and its accounts of early infant behavior He describes his own experiments with the iCub humanoid robot and its development from newborn helplessness to ability levels equal to a nine month old explaining how the iCub learns from its own experiences AI robots are designed to know humans as objects developmental robots will learn empathy Developmental robots with an internal model of self will be better interactive partners with humans That is the kind of future technology we should work toward
