**Recarbonizing global soils - A technical manual of recommended management practices** Food and Agriculture  
Organization of the United Nations, Intergovernmental Technical Panel on Soils, 2021-09-08 During the last decades soil  
organic carbon SOC attracted the attention of a much wider array of specialists beyond agriculture and soil science as it was  
proven to be one of the most crucial components of the earth's climate system which has a great potential to be managed by  
humans Soils as a carbon pool are one of the key factors in several Sustainable Development Goals in particular Goal 15  
Protect restore and promote sustainable use of terrestrial ecosystems sustainably manage forests combat desertification and  
halt and reverse land degradation and halt biodiversity loss with the SOC stock being explicitly cited in Indicator 15.3.1 This  
technical manual is the first attempt to gather in a standardized format the existing data on the impacts of the main soil  
management practices on SOC content in a wide array of environments including the advantages drawbacks and constraints  
This manual presents different sustainable soil management SSM practices at different scales and in different contexts  
supported by case studies that have been shown with quantitative data to have a positive effect on SOC stocks and successful  
experiences of SOC sequestration in practical field applications Volume 4 includes 51 case studies dealing with cropland
