Nanoweapons just might render humanity extinct in the near future a notion that is frightening and shocking but potentially true In Nanoweapons Louis A Del Monte describes the most deadly generation of military weapons the world has ever encountered With dimensions one thousandth the diameter of a single strand of human hair this technology threatens to eradicate humanity as it incites world governments to compete in the deadliest arms race ever In his insightful and prescient account of this risky and radical technology Del Monte predicts that nanoweapons will dominate the battlefield of the future and will help determine the superpowers of the twenty first century He traces the emergence of nanotechnology discusses the current development of nanoweapons such as the mini nuke which weighs five pounds and carries the power of one hundred tons of TNT and offers concrete recommendations founded in historical precedent for controlling their proliferation and avoiding human annihilation Most critically Nanoweapons addresses the question Will it be possible to develop deploy and use nanoweapons in warfare without rendering humanity extinct     **2025** YCT Expert Team, 2025 26 NTA CSIR NET JRF Part A General Aptitude Solved Papers 378 695 E This book contains 73 sets of the previous year solved papers and covers mathematical sciences physical sciences chemical sciences life sciences and earth sciences     Research Handbook on Intellectual Property and the Life Sciences Duncan Matthews, Herbert Zech, 2017-06-30 Intellectual property IP is a key component of the life sciences one of the most dynamic and innovative fields of technology today At the same time the relationship between IP and the life sciences raises new public policy dilemmas The Research Handbook on Intellectual Property and the Life Sciences comprises contributions by leading experts from academia and industry to provide in depth analyses of key topics including pharmaceuticals diagnostics and genes plant innovations stem cells the role of competition law and access to medicines The Research Handbook focuses on the relationship between IP and the life sciences in Europe and the United States complemented by country specific case studies on Australia Brazil China India Japan Kenya South Africa and Thailand to provide a truly international perspective     Fracking David E. Newton, 2015-01-16 The use of fracking is a tremendously important technology for the recovery of oil and gas but the advantages and costs of fracking remain controversial This book examines the issues and social economic political and legal aspects of fracking in the United States Hydraulic fracturing of oil and gas wells known commonly as fracking has been in use in the United States for more than half

a century In recent years however massive expansion of shale gas fracturing across the nation has put fracking in the public eye Is fracking a win win like its proponents say or are there significant costs and dangers associated with the use of this energy production technology This book examines fracking from all angles addressing the promise of the United States becoming energy independent through the use of the process to tap the massive amounts of natural gas and oil available as well as the host of problems associated with fracking groundwater contamination and increased seismic activity just to mention two that raise questions about the long term feasibility of the process as a source of natural gas The first part of the book provides a historical background of the topic a review of technical information about fracking and a detailed discussion of the social economic political legal and other aspects of the current fracking controversy The second part of the book provides a host of resources for readers seeking to learn even more in depth information about the topic supplying a chronology glossary annotated bibliography and profiles of important individuals and organizations Written specifically for students and young adults the content is accessible to readers with little or no previous knowledge regarding fracking

Unforgettable W. Michael Gray, 2016-10-12 We have an uneasy relationship with the relentless deluge of information gushing out of academia and our media outlets To turn it off is escapist but to attempt to cognitively grapple with it is overwhelming In Unforgettable Enabling Deep and Durable Learning a nationally recognized master teacher gives professors and their students the means to chart a clear path through this information explosion Humans crave explanatory patterns and this book enables teachers to think deeply about their academic disciplines to find and articulate their core explanatory principles and to engage their students in a compelling way of thinking An alternative title for this book could be Why the Best College Teachers Do What They Do because the author articulates a compelling rationale that will equip faculty to create and deliver transformative courses Students in transformative courses grapple with essential questions and gain mental muscle that equips them for real world challenges
