Life Sciences P1 Nov 2014 Essay:

China's Peasant Agriculture and Rural Society Jan Douwe van der Ploeg, Jingzhong Ye, 2016-05-20 China's agriculture and rural society has undergone rapid changes in recent years. Many poorer farmers and younger people have moved to cities and yet China has an immense challenge to feed a growing and more affluent population. This book provides a bottom up view of China's agriculture showing how the many millions of Chinese peasants make a living. It presents a vivid description of the mechanisms used by rural households to defend and sustain their livelihoods, increase their agricultural production and improve the quality of their lives. The authors examine the newly emerging trajectories of entrepreneurial and capitalist farming and assess whether such alternatives will be able to meet the enormous social, economic and environmental challenges that China faces. The book also explores the paradigm that has underpinned the organisation and development of China's agriculture from ancient times to the present day. This shows the importance of balancing in the Chinese model as compared to the one-sided imposition of continual modernization in the western model. It is argued that such balancing is at the core of the current Sannong policy referring to the three ruralities of food sovereignty, wellbeing for peasant households and an attractive countryside. *Publishers' Circular and Booksellers' Record of British and Foreign Literature*, 1914

Dennett, 2014-07-01 In a book that is both groundbreaking and accessible, Daniel C. Vague Objects and Vague Identity Ken Akiba, Ali Abasnezhad, 2014-03-18 This unique anthology of new contributed essays offers a range of perspectives on various aspects of ontic vagueness It seeks to answer core questions pertaining to onticism the view that vagueness exists in the world itself The questions to be addressed include whether vague objects must have vague identity and whether ontic vagueness has a distinctive logic one that is not shared by semantic or epistemic vagueness The essays in this volume explain the motivations behind onticism such as the plausibility of mereological vagueness and indeterminacy in quantum mechanics and they offer various arguments both for and against ontic vagueness onticism is also compared with other competing theories of vagueness such as semanticism the view that vagueness exists only in our linguistic representation of the world Gareth Evans s influential paper of 1978 Can There Be Vague Objects gave a simple but cogent argument against the coherence of ontic vagueness Onticism was subsequently dismissed by many However in recent years researchers have become aware of the logical gaps in Evans s argument and this has triggered a new wave of interest in onticism Onticism is now widely regarded as at least a coherent view Reflecting this growing consensus the present anthology for the first time puts together essays that are focused on onticism and its various facets and it fills in the lacuna in the literature on vagueness a much discussed subject in contemporary philosophy
